CROSSWIND	123A90 - HOLLANDSE KUST NOORD WIND PARK BLPH Project COMMISSIONING DOSSIER INDEX	ROSETTI MARINO

Sub System N°:	20-00	Tick as appropriate	ONSHORE	OK
Description:	Electrolyser Package (A-20000)		OFFSHORE	

1. *SUB-SYSTEM DEFINITION*	OK
1.1 Sub-System Description / Boundary Limit Drawings	
2. *READY FOR OPERATION CERTIFICATE*	OK
2.1 Achievement Of Ready for Operation Certificate (RFO)	
2.2 Exception Punch Lists (per discipline)	
2.3 "As-Commissioned" P&ID's / SLD's / D&ID's / C&E's	
3. *CONSOLIDATED PUNCH LISTS*	OK
3.1 Cleared and Residual Items (sorted by discipline)	
4. *FUNCTIONAL TESTS SHEETS*	OK
4.1 Electrical functional test sheets index	
4.2 Electrical "As-Commissioned" interconnection diagrams	
4.3 Instrumentation Functional Test Sheets Index	
4.4 Instrumentation "As-Commissioned" interconnection diagrams	
4.5 Telecommunication Functional Test Sheets Index	
4.6 Telecommunication "As-Commissioned" I.C.D. / TSLD's	
5. *SITE / OPERATIONAL:*	OK
5.1 Operational Test Procedure	
5.2 Operational Test Certificates	
6. *PIPING AND VESSEL PREPARATION*	OK
6.1 Final Mechanical / Vessel Inspection Checks Index	
6.2 Leak Test / Drying / Inerting Test Sheets Index	
6.3 Chemical Loading & First Fill records Index	
6.4 Chemical Cleaning Reports and Records Index	
6.5 Lubrication Schedule	
7. *VENDORS*	OK
7.1 Vendor Package Summary Index	
7.2 SAT Procedure with associated punch list and reference (Front Page)	
7.3 Vendor Spares & Special Tools lists references	
7.4 Vendor Data / Operations / Maintenance Manuals References	
8. *LIST OF MODIFICATIONS*	OK
8.1 List of changes initiated during the WORKSITE Commissioning phase pertaining to the relevant Sub-System will be incorporated in this section with relevant references (with location and position of blinds/spades, isolation LO & LC valves, list of electrical isolation status, and remaining inhibits and overrides)	
9. *SUPPORTING DOCUMENTS*	OK
9.1 Other supporting documents (as applicable)

GENERAL NOTES :
- FOR ALL PACKAGES, REFER TO THE SUPPLIER P&ID FOR COMPLETE INFORMATION
- FOR EACH SLO REFERENCE PLEASE REFER TO C63-PUY-001
- DRAIN VALVES TO BE INSTALLED AT LOWEST POINTS
- ALL EQUIPMENTS AND PIPING OUTSIDE CONTAINERS ARE HEATED USING HEATING RIBBONS

NOTES :
NOTE 1 : BRITISH STANDARD PIPE PARALLEL (TO INSTALL BETWEEN FLANGES)
NOTE 2 : COMMISSIONING AND INITIAL START-UP
NOTE 3 : ACCESSIBLE FOR MAINTENANCE
NOTE 4 : DISSIMILAR TECHNOLOGY BETWEEN THE TWO CHECK VALVES/ CHECK VALVE SHALL MEET CLASS 1 REQUIREMENT
NOTE 5 : DISTANCE OF 5*D REQUIRED UPSTREAM AND DOWNSTREAM OF THE EQUIPEMENT
NOTE 6 : REMOVABLE LINE, USED ONLY FOR MAINTENANCE
NOTE 7 : REFER TO WATER TREATMENT PACKAGE DOCUMENTATION FROM OVIVO FOR COMPLETE P&ID - P&ID N° (90767001_02)
NOTE 8 : PACKAGE TO BE SUPPLIED BY ELOGEN
NOTE 9 : SECTION OUTSIDE CONTAINER SHALL BE INSULATED (X00 zone)

ELECTROLYSER PACKAGE

DUTY: 2.5MW
DESIGN PRESSURE: 40 barg
DESIGN TEMPERATURE: 80 °C
H2 GENERATING CAPACITY: 500 Nm³/h

NOTES

1. PACKAGE SUPPLIED WITH POWER FROM THE BLPH ELECTRICAL SYSTEM.
2. DELETED.
3. DELETED.
4. DELETED.
5. ELECTROLYSER PACKAGE INCLUDES AN OXYGEN VENT LINE WHICH IS IN THE SCOPE OF SUPPLY OF THE ELECTROLYSER PACKAGE UP TO THE ATMOSPHERE. NO PHYSICAL INTERFACE IS PRESENT BETWEEN ELECTROLYSER PACKAGE AND CONTRACTOR ON THIS LINE.
6. AN ISOLATION VALVE DOWNSTREAM THE CHECK VALVE NRV-019 IS PROVIDED WITHIN THE PACKAGE A-20000.
7. CHECK VALVE NRV-019 TO BE INSTALLED AS CLOSE AS POSSIBLE TO THE ELECTROLYSER PACKAGE A-20000.
8. SERIAL COMMUNICATION WITH CONTROL SYSTEM.
9. NITROGEN PURGING CONNECTION TO BE LOCATED AS CLOSE AS POSSIBLE TO MANUAL VALVE BLPH-MV-003.
10. PH, TEMPERATURE, HARDNESS AND CONDUCTIVITY SHALL BE SENT FROM CONTROL SYSTEM TO ELECTROLISER UCP IN ADDITION TO THE OTHER SOFTWARE SIGNALS.

NOTES:

1. TEMPORARY POWER SUPPLY CONNECTION BOX LOCATED ON OUTSIDE WALL OF LV SWITCHROOM / CONTAINER.
2. LOAD DEFINITION 'ESSENTIAL' / 'NON-ESSENTIAL' IS SHOWN IN THE LOAD LIST. THE CCS, EMCS AND 'SMART' SWITCHGEAR WILL OPEN / CLOSE CIRCUIT BREAKERS AS REQUIRED.
3. A COMBINED CCS/EMCS SYSTEM COMPRISES A MICROPROCESSOR BASED SYSTEM, ASSOCIATED SOFTWARE AND REQUIRED PERIPHERALS FOR MONITORING AND CONTROLLING OF ELECTRICAL POWER NETWORK. ALL ELECTRICAL EQUIPMENT AND PACKAGE UNITS SHALL BE CONNECTED TO THE CENTRAL CONTROL SYSTEM .
4. IMPRESSED CURRENT CATHODIC PROTECTION SYSTEM SUPPLIED BY COMPANY.
5. THE SOLAR FARM IN-FEED POWER CIRCUIT BREAKERS PANEL IS LOCATED INSIDE THE LV SWITCHGEAR ROOM B-200.
6. DELETED.
7. DELETED.
8. DELETED.
9. CROSSWIND SHALL BE ABLE TO CONTROL THE BLPH 66KV MOTORISED CIRCUIT BREAKER Q0 (QA1) & MOTORISED ELECTRICAL DISCONNECTOR / EARTH SWITCH (QZ92, TYPE B) USING THEIR 'HV-SCADA' SYSTEM. THIS BACK-UP / REDUNDANT CONTROL SHALL BE ADDITIONAL TO THAT PROVIDED BY THE CCS AND BE OF HIGHER PRIORITY OVER A SEPARATE FIBRE OPTIC CABLE (FOC). THE CCS OPERATOR AND 'HV-SCADA' SHALL BOTH BE KEPT FULLY AWARE OF EQUIPMENT STATUS AT ALL TIMES. INTERTRIPPING, INHIBITS & INTERLOCKING FOR BLPH 66KV EQUIPMENT SHALL BE AS PER THE WIND FARM.
10. THE LOADS IN THE LOW VOLTAGE SWITCHGEAR AND THE CURRENT VALUES OF THE CIRCUIT BREAKERS ARE ONLY INDICATIVE.
11. NEUTRAL POINT OF TR-200ED1 SHALL NOT BE GROUNDED AS REQUIRED BY SOLAR FARM SUPPLIER IN 123A90-PML-PM-TQ-00040.

Ready For Operation (RFO) Certificate

COMPLETE	●	PARTIAL	

Revision:	3		Issued on:	2025-06-27	
System:	20	/	Electrolyser package		
SubSystem:	20-00	/	Electrolyser Package (A-20000)		

We hereby confirm that all Mechanical Completion (MC) and Pre-Commissioning/Commissioning (Pre-Comm./Comm.) activities for the above-mentioned System/Sub-System have been successfully completed in accordance with project specifications, relevant standards and contractual requirements. The System/Sub-System has been tested and verified to ensure readiness for operation. Issuance of this Certificate shall not release CONTRACTOR from any of his obligations, responsibilities or liabilities under the CONTRACT.

- **Mechanical Completion:** All required MC activities have been completed and approved
- **Pre-Commissioning & Commissioning:** All required Pre-Comm. and Comm. activities and OTPs have been completed and approved (Status Index attached)
- **Punch List:** All Punch items categorized as A and B have been cleared (PL report attached)
- **Documentation:** As-built documentation and Commissioning dossier has been completed, reviewed and approved

PUNCH LIST	PENDING POINTS
Note: All Category "A" and "B" Items must be cleared prior to issuance of the Ready For Operation (RFO) Certificate	B: 6

Breaker rating (A)	630A	Nominal current (A)	497A

FUNCTION TEST REQUIREMENT

1	Check pre-commissioning activities have been carried out				OK
2	Check equipment for cleaness				OK
3	Measure I/R value of equipment and feeder cable at 1000V (Min value: 10 Mohm)	>1000	MΩ		OK
4	Energise control of equipment feeder				OK
5	Full test feeder breaker operation in test position				OK
6	Check protection setting				OK
7	Test interface trips and signals (remote alarms & status). Check the relevant ITR presence in the system				OK
8	Test control and safety functions according to manufacturer's procedure.				OK
9	Energize				OK
10	Measure Voltage and Current values at feeder breaker	422	V	0.1 A	OK
11	Attach test procedure, if any				NA

Comments: The protection settings that have been implemented on drawer A1/+08 were defined by the Commissioning team to allow the internal testing of the Electroliser drawer. The definitive settings will be implemented asap, in the meantime a PUNCH B ref. C30000158 has been raised to ensure traceability of this outstanding task.

Column 1 (To check) to be filled during commissioning preparation stage - black if the check is asked
Column 2 (Checked) to be filled black if check is Ok

Comments: During the test, we tested all the Analog Input with success: Current "L1",Current "L2",Current "L3", Voltage "L1-L2", Voltage "L2-L3", Voltage "L1-L3", Frequency, Apparent Power, Real Power, Reactive Power, Power Factor. Abd other that we tested are CB closed and inserted, CB open or disconnected and Local position.

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OK	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X	NA	
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X		
28	Stopping boxes and cable boxes are corrected filled	X	NA	
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x	OK	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x	OK	
50	Cable glands are of the correct type and installed correctly	x	OK	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	OK	
52	Flame path are clean and undamaged	x	OK	
53	Flange gap dimensions are within tolerances	x	OK	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x		
71	Breathing operation is satisfactory (type "nR" only)	x	NA	
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
	Extra Ex p checks			
77	Pressurization gas is correct type	x		
78	Actual pressure is within maximum and minimum settings for equipment	x		
79	Timers set as per certification documentation	x		
80	Alarms and trip functions operate correctly as per certification documentation	x		
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
82	Automatic electrical protective devices operate within permitted limits	x		
83	Automatic electrical protective devices are set correctly	x		
84	Protective gas inlet temperature is below maximum specified	x		
85	Ducts, pipes and enclosures are in good condition	x		
	General Equipment	**Detailed**	**OK/NA/PL**	**Comments**
86	Protective gas is substantially free from contaminants	x		
87	Protective gas pressure and/or flow is adequate	x		
88	Pressure and/or flow indicators, alarms and interlocks function correctly	x		
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	x		
90	Specific conditions of use (if applicable) are complied with			
	Extra Ex i (Intrinsically Safe – IS) checks			
91	Equipment has adequate circuit identification for 'IS' Installation	x		
92	Cables are installed in accordance with the documentation	x		
93	Segregation is maintained between IS and non-IS Circuits	x		
94	Cable screens are isolated at one end (field side)	x		
95	Cable screens are earthed in accordance with the documentation	x		
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	x		
97	Equipment installed is the one specified in the documentation	x		
98	Ambient temperature range of the apparatus is correct for the installation	x		
99	Service temperature range of the apparatus is correct for the installation	x		
100	Installation is clearly labelled	x		
101	Printed circuit boards are clean and undamaged	x		
102	The maximum voltage Um of the associated apparatus is not exceeded	x		
103	Point-to-point connections are all correct	x		
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	x		
105	Earth connections maintain the integrity of the type of protection	x		
106	Intrinsically safe circuit earthing is satisfactory	x		
107	Insulation resistance is satisfactory	x		
108	Short-circuit protection of the power supply is in accordance with the documentation	x

Equipment Protection Type	Ex db	EPL		Gas group	II 2G	Temp class	T5	IP Rating	66

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OK	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X	NA	
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X		
28	Stopping boxes and cable boxes are corrected filled	X	NA	
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x	OK	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x	OK	
50	Cable glands are of the correct type and installed correctly	x	OK	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	OK	
52	Flame path are clean and undamaged	x	OK	
53	Flange gap dimensions are within tolerances	x	OK	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
	Extra Ex p checks			
77	Pressurization gas is correct type	x		
78	Actual pressure is within maximum and minimum settings for equipment	x		
79	Timers set as per certification documentation	x		
80	Alarms and trip functions operate correctly as per certification documentation	x	NA	
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
82	Automatic electrical protective devices operate within permitted limits	x		
83	Automatic electrical protective devices are set correctly	x		
84	Protective gas inlet temperature is below maximum specified	x		
85	Ducts, pipes and enclosures are in good condition	x		
	General Equipment	**Detailed**	**OK/NA/PL**	**Comments**
86	Protective gas is substantially free from contaminants	x		
87	Protective gas pressure and/or flow is adequate	x		
88	Pressure and/or flow indicators, alarms and interlocks function correctly	x	NA	
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	x		
90	Specific conditions of use (if applicable) are complied with			
	Extra Ex i (Intrinsically Safe – IS) checks			
91	Equipment has adequate circuit identification for 'IS' Installation	x		
92	Cables are installed in accordance with the documentation	x		
93	Segregation is maintained between IS and non-IS Circuits	x		
94	Cable screens are isolated at one end (field side)	x		
95	Cable screens are earthed in accordance with the documentation	x		
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	x		
97	Equipment installed is the one specified in the documentation	x		
98	Ambient temperature range of the apparatus is correct for the installation	x	NA	
99	Service temperature range of the apparatus is correct for the installation	x		
100	Installation is clearly labelled	x		
101	Printed circuit boards are clean and undamaged	x		
102	The maximum voltage Um of the associated apparatus is not exceeded	x		
103	Point-to-point connections are all correct	x		
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	x		
105	Earth connections maintain the integrity of the type of protection	x		
106	Intrinsically safe circuit earthing is satisfactory	x		
107	Insulation resistance is satisfactory	x		
108	Short-circuit protection of the power supply is in accordance with the documentation	x

73	The ventilation airflow is not impeded.	X	NA	/
74	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
75	Motor protection devices operate within the permitted tE or tA time limits	X	NA	/
76	Variable voltage/frequency installation complies with documentation	X	NA	/

Extra Ex p checks				
77	Pressurization gas is correct type	X	NA	/
78	Actual pressure is within maximum and minimum settings for equipment	X	NA	/
79	Timers set as per certification documentation	X	NA	/
80	Alarms and trip functions operate correctly as per certification documentation	X	NA	/
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
82	Automatic electrical protective devices operate within permitted limits	X	NA	/
83	Automatic electrical protective devices are set correctly	X	NA	/
84	Protective gas inlet temperature is below maximum specified	X	NA	/
85	Ducts, pipes and enclosures are in good condition	X	NA	/
86	Protective gas is substantially free from contaminants	X	NA	/
87	Protective gas pressure and/or flow is adequate	X	NA	/
88	Pressure and/or flow indicators, alarms and interlocks function correctly	X	NA	/
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	X	NA	/
90	Specific conditions of use (if applicable) are complied with		NA	/
Extra Ex i (Intrinsically Safe – IS) checks				
91	Equipment has adequate circuit identification for 'IS' Installation	X	NA	/
92	Cables are installed in accordance with the documentation	X	NA	/
93	Segregation is maintained between IS and non-IS Circuits	X	NA	/
94	Cable screens are isolated at one end (field side)	X	NA	/
95	Cable screens are earthed in accordance with the documentation	X	NA	/
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	X	NA	/
97	Equipment installed is the one specified in the documentation	X	NA	/
98	Ambient temperature range of the apparatus is correct for the installation	X	NA	/
99	Service temperature range of the apparatus is correct for the installation	X	NA	/
100	Installation is clearly labelled	X	NA	/
101	Printed circuit boards are clean and undamaged	X	NA	/
102	The maximum voltage Um of the associated apparatus is not exceeded	X	NA	/
103	Point-to-point connections are all correct	X	NA	/
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	X	NA	/
105	Earth connections maintain the integrity of the type of protection	X	NA	/
106	Intrinsically safe circuit earthing is satisfactory	X	NA	/
107	Insulation resistance is satisfactory	X	NA	/
108	Short-circuit protection of the power supply is in accordance with the documentation	X	NA	/

Remarks: Initial inspection should be detailed and carried out before equipment is brought into service as per IEC 60079-17	**Please mark only one box as appropriate**

Model	99.00563			Serial Number		2445-0661			
Drawing				Datasheet					
Cert No.	-			Equipment Ambient Temp.		-10 / + 55 °C			
Area Classification	IIC (IIB+H2)	Zone	2	Gas group	3G	Temp class	T1		
Equipment Protection Type	Ex ec	EPL		Gas group	II 3G	Temp class	T4	IP Rating	66

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	NA	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X		
19	Flameproof components are undamaged	X		
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X	NA	
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X	OK	
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X		
28	Stopping boxes and cable boxes are corrected filled	X	NA	
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK

47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x	NA	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x		
53	Flange gap dimensions are within tolerances	x		
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x	OK	
60	Power conductors are not bunched together causing possible hot spots	x	OK	
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X		
17	Unused terminals are tightened	X		
18	Encapsulated components are undamaged	X		
19	Flameproof components are undamaged	X	NA	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	NA	

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x	NA	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x		
53	Flange gap dimensions are within tolerances	x		
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	(1) PL	/
2	Equipment group is correct	X	OK	/
3	Equipment temperature class is correct	X	OK	/
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	/
5	Equipment circuit identification is correct	X	OK	/
6	Equipment circuit identification is available	X	OK	/
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	NA	/
8	There is no damage or unauthorized modifications	X	OK	/
9	There is no evidence of unauthorized modifications	X	OK	/
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight. Physical check	X	OK	/
11	Threaded covers on enclosures are of the correct type, are tight and secured. Physical check	X	OK	/
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	/
13	Condition of enclosure gaskets is satisfactory	X	OK	/
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	/
15	Electrical connections are tight	X	OK	/
16	Bridging links do not reduce creepage / clearance and are allowed	X		/
17	Unused terminals are tightened	X		/
18	Encapsulated components are undamaged	X	NA	/
19	Flameproof components are undamaged	X		/
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		/
21	HID lamps are not indicating EOL effects	X		/
22	Lamp type, rating, pin configuration and position are correct	X		/
23	Breathing and drainage devices are satisfactory	X		/
24	Type of cable is appropriate	X	OK	/
25	There is no obvious damage to the cables	X	OK	/
26	Cable glands are the correct type and installed correctly	X	OK	/
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X		/
28	Stopping boxes and cable boxes are corrected filled	X	NA	/
29	Integrity of conduit system and interface with mixed system maintained	X		/
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section. Physical check	X	OK	/

(1) AMBIENT TEMP NOT SUITABLE WITH WP3 ITEM -40/(+40)
WP3 +5/(+45)

	General Equipment	Detailed	OK/NA/PL	Comments
31	Automated electric protective devices operate within permitted limits	X	NA	/
32	Special conditions (if applicable) have been complied with.	X		/
33	All cable cores are uniquely labeled	X	OK	/
34	Cable cores not in use are correctly terminated	X	OK	/
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	X	OK	/
36	No undue accumulation of dust and dirt	X	OK	/
37	All equipment housings are clean and dry	X	OK	/
38	All moving parts are free and have no mechanical damage	X	NA	/
Applicable for Installation of Heating Systems				
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	X	NA	/
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	X	NA	/
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	X	NA	/
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	X	NA	/
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	X	NA	/
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	X	NA	/
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	X	NA	/
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	X	NA	/
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	X	NA	/
Extra Ex d checks				
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	X	NA	/
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	X	NA	/
50	Cable glands are of the correct type and installed correctly	X	NA	/
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	X	NA	/
52	Flame path are clean and undamaged	X	NA	/
53	Flange gap dimensions are within tolerances	X	NA	/
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	X	NA	/
55	The ventilation airflow is not impeded	X	NA	/
56	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
58	Variable voltage/frequency installation complies with documentation	X	NA	/
Extra Ex e checks				
59	All Equipment is Ex e certified (including components within enclosure)	X	OK	/
60	Power conductors are not bunched together causing possible hot spots	X	OK	/
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	X	NA	/
62	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
64	The ventilation airflow is not impeded	X	NA	/
65	Motor protection devices operate within the permitted tE or tA time limits.	X	NA	/
66	Variable voltage/frequency installation complies with documentation	X	NA	/
Extra Ex n (nR, nL) checks				
67	All Terminals are Ex n certified (if required on certificate)	X	NA	/
68	Hermetically sealed and enclosed break devices are undamaged	X	NA	/
69	Restricted breathing properties satisfactory (conduct vacuum test)	X	NA	/
70	Test port, if fitted, is functional (type "nR" only)	X	NA	/
71	Breathing operation is satisfactory (type "nR" only)	X	NA	/
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	X	NA	/
73	The ventilation airflow is not impeded.	X	NA	/
74	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
75	Motor protection devices operate within the permitted tE or tA time limits	X	NA	/
76	Variable voltage/frequency installation complies with documentation	X	NA	/

Extra Ex p checks				
77	Pressurization gas is correct type	X	NA	/
78	Actual pressure is within maximum and minimum settings for equipment	X	NA	/
79	Timers set as per certification documentation	X	NA	/
80	Alarms and trip functions operate correctly as per certification documentation	X	NA	/
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
82	Automatic electrical protective devices operate within permitted limits	X	NA	/
83	Automatic electrical protective devices are set correctly	X	NA	/
84	Protective gas inlet temperature is below maximum specified	X	NA	/
85	Ducts, pipes and enclosures are in good condition	X	NA	/
86	Protective gas is substantially free from contaminants	X	NA	/
87	Protective gas pressure and/or flow is adequate	X	NA	/
88	Pressure and/or flow indicators, alarms and interlocks function correctly	X	NA	/
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	X	NA	/
90	Specific conditions of use (if applicable) are complied with		NA	/
Extra Ex i (Intrinsically Safe – IS) checks				
91	Equipment has adequate circuit identification for 'IS' Installation	X	NA	/
92	Cables are installed in accordance with the documentation	X	NA	/
93	Segregation is maintained between IS and non-IS Circuits	X	NA	/
94	Cable screens are isolated at one end (field side)	X	NA	/
95	Cable screens are earthed in accordance with the documentation	X	NA	/
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	X	NA	/
97	Equipment installed is the one specified in the documentation	X	NA	/
98	Ambient temperature range of the apparatus is correct for the installation	X	NA	/
99	Service temperature range of the apparatus is correct for the installation	X	NA	/
100	Installation is clearly labelled	X	NA	/
101	Printed circuit boards are clean and undamaged	X	NA	/
102	The maximum voltage Um of the associated apparatus is not exceeded	X	NA	/
103	Point-to-point connections are all correct	X	NA	/
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	X	NA	/
105	Earth connections maintain the integrity of the type of protection	X	NA	/
106	Intrinsically safe circuit earthing is satisfactory	X	NA	/
107	Insulation resistance is satisfactory	X	NA	/
108	Short-circuit protection of the power supply is in accordance with the documentation	X	NA	/

57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x	Ok	
60	Power conductors are not bunched together causing possible hot spots	x	Ok	
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x	NA	
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x		
71	Breathing operation is satisfactory (type "nR" only)	x	NA	
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

Schedule Ref. #	19			Area Code		WP3			
Area Class Drawing				Manufacturer / Description		MICHELL / DEW POINT TRANSMITTER			
Model	Easidew Pro XP			Serial Number		1FEB-075			
Drawing				Datasheet					
Cert No.	CML19ATEX1411X			Equipment Ambient Temp.		-20 / +70 °C			
Area Classification	IIC (IIB+H2)	Zone	2	Gas group	3G	Temp class	T1		
Equipment Protection Type	Ex db ia	EPL		Gas group	II 2GD	Temp class	T6	IP Rating	66

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	NA	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	OK	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X		
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	NA

Drawing				Datasheet					
Cert No.	PTB03ATEXD127X			Equipment Ambient Temp.		-40 / +70 °C			
Area Classification	IIC (IIB+H2)	Zone	2	Gas group	3G	Temp class	T1		
Equipment Protection Type	Ex h	EPL		Gas group	II 2G IIC	Temp class	T6 / T2	IP Rating	0

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	NA	
6	Equipment circuit identification is available	X		
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	NA	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	NA	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X		
16	Bridging links do not reduce creepage / clearance and are allowed	X		
17	Unused terminals are tightened	X		
18	Encapsulated components are undamaged	X		
19	Flameproof components are undamaged	X		
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X	NA	
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X		
25	There is no obvious damage to the cables	X		
26	Cable glands are the correct type and installed correctly	X		
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X		
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x		
31	Automated electric protective devices operate within permitted limits	x		
32	Special conditions (if applicable) have been complied with.	x		
33	All cable cores are uniquely labeled	x		
34	Cable cores not in use are correctly terminated	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	OK	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x	NA	
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x		
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x		
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x	NA	
53	Flange gap dimensions are within tolerances	x		
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
	Extra Ex p checks			
77	Pressurization gas is correct type	x		
78	Actual pressure is within maximum and minimum settings for equipment	x		
79	Timers set as per certification documentation	x	NA	
80	Alarms and trip functions operate correctly as per certification documentation	x		
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
82	Automatic electrical protective devices operate within permitted limits	x		
83	Automatic electrical protective devices are set correctly	x		
84	Protective gas inlet temperature is below maximum specified	x		
85	Ducts, pipes and enclosures are in good condition	x		
	General Equipment	**Detailed**	**OK/NA/PL**	**Comments**
86	Protective gas is substantially free from contaminants	x		
87	Protective gas pressure and/or flow is adequate	x		
88	Pressure and/or flow indicators, alarms and interlocks function correctly	x	NA	
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	x		
90	Specific conditions of use (if applicable) are complied with			
	Extra Ex i (Intrinsically Safe – IS) checks			
91	Equipment has adequate circuit identification for 'IS' Installation	x		
92	Cables are installed in accordance with the documentation	x		
93	Segregation is maintained between IS and non-IS Circuits	x		
94	Cable screens are isolated at one end (field side)	x		
95	Cable screens are earthed in accordance with the documentation	x		
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	x		
97	Equipment installed is the one specified in the documentation	x		
98	Ambient temperature range of the apparatus is correct for the installation	x		
99	Service temperature range of the apparatus is correct for the installation	x		
100	Installation is clearly labelled	x		
101	Printed circuit boards are clean and undamaged	x	NA	
102	The maximum voltage Um of the associated apparatus is not exceeded	x		
103	Point-to-point connections are all correct	x		
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	x		
105	Earth connections maintain the integrity of the type of protection	x		
106	Intrinsically safe circuit earthing is satisfactory	x		
107	Insulation resistance is satisfactory	x		
108	Short-circuit protection of the power supply is in accordance with the documentation	x

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X		
17	Unused terminals are tightened	X		
18	Encapsulated components are undamaged	X		
19	Flameproof components are undamaged	X	NA	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x	NA	
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x		
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x		
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x		
53	Flange gap dimensions are within tolerances	x	NA	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x		
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x	NA	
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x		
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x		
53	Flange gap dimensions are within tolerances	x	NA	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x		
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x	NA	
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

Area Class Drawing				Manufacturer / Description		ENDRESS HAUSER / FLOW TRANSMITTER			
Model	Deltabar PMD75B			Serial Number		W701B30119A			
Drawing				Datasheet					
Cert No.	DEKRA22ATEX0051			Equipment Ambient Temp.		-50 / +65 °C			
Area Classification	IIC (IIB+H2)	Zone	2	Gas group	3G	Temp class	T1		
Equipment Protection Type	Ex db	EPL		Gas group	II 2G IIC	Temp class	T6 / T1	IP Rating	0

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OK	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X	NA	
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X		
28	Stopping boxes and cable boxes are corrected filled	X	NA	
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x		
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x	NA	
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x	OK	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x	OK	
50	Cable glands are of the correct type and installed correctly	x	OK	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	OK	
52	Flame path are clean and undamaged	x	OK	
53	Flange gap dimensions are within tolerances	x	OK	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x	NA	
70	Test port, if fitted, is functional (type "nR" only)	x		
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

Model	X5000			Serial Number		10020018502BF			
Drawing				Datasheet					
Cert No.	FM21ATEX0071			Equipment Ambient Temp.		-40 / +60 °C			
Area Classification	IIC (IIB+H2)	Zone	2	Gas group	3G	Temp class	T1		
Equipment Protection Type	Ex db	EPL		Gas group	II 2G IIC	Temp class	T5	IP Rating	66

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight		OK	
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured		OK	
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OK	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X	NA	
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x	OK	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x	OK	
50	Cable glands are of the correct type and installed correctly	x	OK	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	OK	
52	Flame path are clean and undamaged	x	OK	
53	Flange gap dimensions are within tolerances	x	OK	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x

	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x	NA	
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x		
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x	OK	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x	NA	
50	Cable glands are of the correct type and installed correctly	x	OK	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	OK	
52	Flame path are clean and undamaged	x	OK	
53	Flange gap dimensions are within tolerances	x	OK	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x		
71	Breathing operation is satisfactory (type "nR" only)	x	NA	
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	OK	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	~~OK~~	
19	Flameproof components are undamaged	X	NA	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X	OK	
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X	NA	
29	Integrity of conduit system and interface with mixed system maintained	x	~~NA~~ NA	
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	OK	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x		
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x	NA	
53	Flange gap dimensions are within tolerances	x		
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

① AMBIENT TEMP NOT SUITABLE WITH WP3 ITEM -40/(+40)
WP3 +5/(+45)

	General Equipment	Detailed	OK/NA/PL	Comments
31	Automated electric protective devices operate within permitted limits	X	NA	/
32	Special conditions (if applicable) have been complied with.	X	NA	/
33	All cable cores are uniquely labeled	X	OK	/
34	Cable cores not in use are correctly terminated	X	OK	/
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	X	OK	/
36	No undue accumulation of dust and dirt	X	OK	/
37	All equipment housings are clean and dry	X	OK	/
38	All moving parts are free and have no mechanical damage	X	NA	/
Applicable for Installation of Heating Systems				
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	X	NA	/
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	X	NA	/
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	X	NA	/
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	X	NA	/
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	X	NA	/
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	X	NA	/
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	X	NA	/
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	X	NA	/
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	X	NA	/
Extra Ex d checks				
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	X	NA	/
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	X	NA	/
50	Cable glands are of the correct type and installed correctly	X	NA	/
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	X	NA	/
52	Flame path are clean and undamaged	X	NA	/
53	Flange gap dimensions are within tolerances	X	NA	/
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	X	NA	/
55	The ventilation airflow is not impeded	X	NA	/
56	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
58	Variable voltage/frequency installation complies with documentation	X	NA	/
Extra Ex e checks				
59	All Equipment is Ex e certified (including components within enclosure)	X	OK	/
60	Power conductors are not bunched together causing possible hot spots	X	OK	/
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	X	NA	/
62	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
64	The ventilation airflow is not impeded	X	NA	/
65	Motor protection devices operate within the permitted tE or tA time limits.	X	NA	/
66	Variable voltage/frequency installation complies with documentation	X	NA	/
Extra Ex n (nR, nL) checks				
67	All Terminals are Ex n certified (if required on certificate)	X	NA	/
68	Hermetically sealed and enclosed break devices are undamaged	X	NA	/
69	Restricted breathing properties satisfactory (conduct vacuum test)	X	NA	/
70	Test port, if fitted, is functional (type "nR" only)	X	NA	/
71	Breathing operation is satisfactory (type "nR" only)	X	NA	/
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	X	NA	/
73	The ventilation airflow is not impeded.	X	NA	/
74	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
75	Motor protection devices operate within the permitted tE or tA time limits	X	NA	/
76	Variable voltage/frequency installation complies with documentation	X	NA	/

52	Flame path are clean and undamaged	X	NA	/
53	Flange gap dimensions are within tolerances	X	NA	/
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	X	NA	/
55	The ventilation airflow is not impeded	X	NA	/
56	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
58	Variable voltage/frequency installation complies with documentation	X	NA	/
Extra Ex e checks				
59	All Equipment is Ex e certified (including components within enclosure)	X	OK	/
60	Power conductors are not bunched together causing possible hot spots	X	OK	/
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	X	NA	/
62	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
64	The ventilation airflow is not impeded	X	NA	/
65	Motor protection devices operate within the permitted tE or tA time limits.	X	NA	/
66	Variable voltage/frequency installation complies with documentation	X	NA	/
Extra Ex n (nR, nL) checks				
67	All Terminals are Ex n certified (if required on certificate)	X	NA	/
68	Hermetically sealed and enclosed break devices are undamaged	X	NA	/
69	Restricted breathing properties satisfactory (conduct vacuum test)	X	NA	/
70	Test port, if fitted, is functional (type "nR" only)	X	NA	/
71	Breathing operation is satisfactory (type "nR" only)	X	NA	/
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	X	NA	/
73	The ventilation airflow is not impeded.	X	NA	/
74	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
75	Motor protection devices operate within the permitted tE or tA time limits	X	NA	/
76	Variable voltage/frequency installation complies with documentation	X	NA	/

Extra Ex p checks				
77	Pressurization gas is correct type	X	NA	/
78	Actual pressure is within maximum and minimum settings for equipment	X	NA	/
79	Timers set as per certification documentation	X	NA	/
80	Alarms and trip functions operate correctly as per certification documentation	X	NA	/
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
82	Automatic electrical protective devices operate within permitted limits	X	NA	/
83	Automatic electrical protective devices are set correctly	X	NA	/
84	Protective gas inlet temperature is below maximum specified	X	NA	/
85	Ducts, pipes and enclosures are in good condition	X	NA	/
86	Protective gas is substantially free from contaminants	X	NA	/
87	Protective gas pressure and/or flow is adequate	X	NA	/
88	Pressure and/or flow indicators, alarms and interlocks function correctly	X	NA	/
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	X	NA	/
90	Specific conditions of use (if applicable) are complied with		NA	/
Extra Ex i (Intrinsically Safe – IS) checks				
91	Equipment has adequate circuit identification for 'IS' Installation	X	NA	/
92	Cables are installed in accordance with the documentation	X	NA	/
93	Segregation is maintained between IS and non-IS Circuits	X	NA	/
94	Cable screens are isolated at one end (field side)	X	NA	/
95	Cable screens are earthed in accordance with the documentation	X	NA	/
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	X	NA	/
97	Equipment installed is the one specified in the documentation	X	NA	/
98	Ambient temperature range of the apparatus is correct for the installation	X	NA	/
99	Service temperature range of the apparatus is correct for the installation	X	NA	/
100	Installation is clearly labelled	X	NA	/
101	Printed circuit boards are clean and undamaged	X	NA	/
102	The maximum voltage Um of the associated apparatus is not exceeded	X	NA	/
103	Point-to-point connections are all correct	X	NA	/
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	X	NA	/
105	Earth connections maintain the integrity of the type of protection	X	NA	/
106	Intrinsically safe circuit earthing is satisfactory	X	NA	/
107	Insulation resistance is satisfactory	X	NA	/
108	Short-circuit protection of the power supply is in accordance with the documentation	X	NA	/

Remarks: Initial inspection should be detailed and carried out before equipment is brought into service as per IEC 60079-17	**Please mark only one box as appropriate**

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	(1) PL	/
2	Equipment group is correct	X	OK	/
3	Equipment temperature class is correct	X	OK	/
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	/
5	Equipment circuit identification is correct	X	OK	/
6	Equipment circuit identification is available	X	OK	/
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	NA	/
8	There is no damage or unauthorized modifications	X	OK	/
9	There is no evidence of unauthorized modifications	X	OK	/
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight. Physical check	X	OK	/
11	Threaded covers on enclosures are of the correct type, are tight and secured. Physical check	X	OK	/
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	/
13	Condition of enclosure gaskets is satisfactory	X	OK	/
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	/
15	Electrical connections are tight	X	OK	/
16	Bridging links do not reduce creepage / clearance and are allowed	X		/
17	Unused terminals are tightened	X		/
18	Encapsulated components are undamaged	X		/
19	Flameproof components are undamaged	X	NA	/
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		/
21	HID lamps are not indicating EOL effects	X		/
22	Lamp type, rating, pin configuration and position are correct	X		/
23	Breathing and drainage devices are satisfactory	X		/
24	Type of cable is appropriate	X	OK	/
25	There is no obvious damage to the cables	X	OK	/
26	Cable glands are the correct type and installed correctly	X	OK	/
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X		/
28	Stopping boxes and cable boxes are corrected filled	X	NA	/
29	Integrity of conduit system and interface with mixed system maintained	X		/
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section. Physical check	X	OK	/

Drawing				Datasheet					
Cert No.	KIWA 19ATEX0017X			Equipment Ambient Temp.		-50 / +70°C			
Area Classification	IIC (IIB+H2)	Zone	2	Gas group	3G	Temp class	T1		
Equipment Protection Type	Ex db	EPL		Gas group	II 2G IIC	Temp class	T6...T1	IP Rating	0

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OM	
2	Equipment group is correct	X	OM	
3	Equipment temperature class is correct	X	OM	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OM	
5	Equipment circuit identification is correct	X	OM	
6	Equipment circuit identification is available	X	OM	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OM	
8	There is no damage or unauthorized modifications	X	OM	
9	There is no evidence of unauthorized modifications	X	OM	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OM	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OM	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OM	
13	Condition of enclosure gaskets is satisfactory	X	OM	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OM	
15	Electrical connections are tight	X	OM	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OM	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OM	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X	NA	
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X	OM	
24	Type of cable is appropriate	X	OM	
25	There is no obvious damage to the cables	X	OM	
26	Cable glands are the correct type and installed correctly	X	OM	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X	NA	
29	Integrity of conduit system and interface with mixed system maintained	x	NA	
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OM	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OM	
33	All cable cores are uniquely labeled	x	OM	
34	Cable cores not in use are correctly terminated	x	OM	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OM	
36	No undue accumulation of dust and dirt	x	OM	
37	All equipment housings are clean and dry	x	OM	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x	OM	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x	OM	
50	Cable glands are of the correct type and installed correctly	x	OM	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	OM	
52	Flame path are clean and undamaged	x	OM	
53	Flange gap dimensions are within tolerances	x	OM	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OM	
2	Equipment group is correct	X	OM	
3	Equipment temperature class is correct	X	OM	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OM	
5	Equipment circuit identification is correct	X	OM	
6	Equipment circuit identification is available	X	OM	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OM	
8	There is no damage or unauthorized modifications	X	OM	
9	There is no evidence of unauthorized modifications	X	OM	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OM	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OM	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OM	
13	Condition of enclosure gaskets is satisfactory	X	OM	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OM	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OM	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OM	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X	NA	
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X	OM	
24	Type of cable is appropriate	X	OM	
25	There is no obvious damage to the cables	X	OM	
26	Cable glands are the correct type and installed correctly	X	OM	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X	NA

	TASK	HAZARDOUS AREA EQUIPMENT DETAILED INSPECTION			
Type (ELE/MEC)	C	TAG	LSL-600	SYSTEM	C-63 ELECTROLYZER

Schedule Ref. #	67			Area Code		WP3			
Area Class Drawing				Manufacturer / Description		ENDRESS HAUSER / LEVEL SWITCH			
Model	FTL51B			Serial Number		W 51012011 92			
Drawing				Datasheet					
Cert No.	KIWA 19ATEX0017X			Equipment Ambient Temp.		-50 / +70°C			
Area Classification	IIC (IIB+H2)	Zone	2	Gas group	3G	Temp class	T1		
Equipment Protection Type	Ex db	EPL		Gas group	II 2G IIC	Temp class	T6...T1	IP Rating	0

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OK	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X	NA	
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X	OK	
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X	NA	
29	Integrity of conduit system and interface with mixed system maintained	x	NA	
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x	OK	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x	OK	
50	Cable glands are of the correct type and installed correctly	x	OK	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	OK	
52	Flame path are clean and undamaged	x	OK	
53	Flange gap dimensions are within tolerances	x	OK	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
	Extra Ex p checks			
77	Pressurization gas is correct type	x		
78	Actual pressure is within maximum and minimum settings for equipment	x		
79	Timers set as per certification documentation	x		
80	Alarms and trip functions operate correctly as per certification documentation	x	NA	
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
82	Automatic electrical protective devices operate within permitted limits	x		
83	Automatic electrical protective devices are set correctly	x		
84	Protective gas inlet temperature is below maximum specified	x		
85	Ducts, pipes and enclosures are in good condition	x		
	General Equipment	**Detailed**	**OK/NA/PL**	**Comments**
86	Protective gas is substantially free from contaminants	x		
87	Protective gas pressure and/or flow is adequate	x		
88	Pressure and/or flow indicators, alarms and interlocks function correctly	x	NA	
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	x		
90	Specific conditions of use (if applicable) are complied with			
	Extra Ex i (Intrinsically Safe – IS) checks			
91	Equipment has adequate circuit identification for 'IS' Installation	x		
92	Cables are installed in accordance with the documentation	x		
93	Segregation is maintained between IS and non-IS Circuits	x		
94	Cable screens are isolated at one end (field side)	x		
95	Cable screens are earthed in accordance with the documentation	x		
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	x	NA	
97	Equipment installed is the one specified in the documentation	x		
98	Ambient temperature range of the apparatus is correct for the installation	x		
99	Service temperature range of the apparatus is correct for the installation	x		
100	Installation is clearly labelled	x		
101	Printed circuit boards are clean and undamaged	x		
102	The maximum voltage Um of the associated apparatus is not exceeded	x		
103	Point-to-point connections are all correct	x		
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	x		
105	Earth connections maintain the integrity of the type of protection	x		
106	Intrinsically safe circuit earthing is satisfactory	x		
107	Insulation resistance is satisfactory	x		
108	Short-circuit protection of the power supply is in accordance with the documentation	x

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OM	
2	Equipment group is correct	X	OM	
3	Equipment temperature class is correct	X	OM	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OM	
5	Equipment circuit identification is correct	X	OM	
6	Equipment circuit identification is available	X	OM	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OM	
8	There is no damage or unauthorized modifications	X	OM	
9	There is no evidence of unauthorized modifications	X	OM	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OM	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OM	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OM	
13	Condition of enclosure gaskets is satisfactory	X	OM	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OM	
15	Electrical connections are tight	X	OM	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OM	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OM	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X	NA	
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X	OM	
24	Type of cable is appropriate	X	OM	
25	There is no obvious damage to the cables	X	OM	
26	Cable glands are the correct type and installed correctly	X	OM	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X	NA	
29	Integrity of conduit system and interface with mixed system maintained	x	NA	
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OM	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OM	
33	All cable cores are uniquely labeled	x	OM	
34	Cable cores not in use are correctly terminated	x	OM

i) LACK OF COMPOUND IN THE CABLE GLAND OF CABLE P-JB-PWR-01/LSL-620 → SOLVED 12/02

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x	OK	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x	OK	
50	Cable glands are of the correct type and installed correctly	x	OK	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	OK	
52	Flame path are clean and undamaged	x	OK	
53	Flange gap dimensions are within tolerances	x	OK	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x	OK	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x	OK	
50	Cable glands are of the correct type and installed correctly	x	OK	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	OK	
52	Flame path are clean and undamaged	x	OK	
53	Flange gap dimensions are within tolerances	x	OK	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

Area Classification	IIC (IIB+H2)	Zone	2	Gas group	3G	Temp class	T1		
Equipment Protection Type	Ex db	EPL		Gas group	II 2G IIC	Temp class	T6...T1	IP Rating	0

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OK	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X	NA	
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X	OK	
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X	NA	
29	Integrity of conduit system and interface with mixed system maintained	x	NA	
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x

2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OK	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X	NA	
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X	NA	
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x		
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x	OK	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x	OK	
50	Cable glands are of the correct type and installed correctly	x	OK	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	OK	
52	Flame path are clean and undamaged	x	OK	
53	Flange gap dimensions are within tolerances	x	OK	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	NA	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X		
19	Flameproof components are undamaged	X		
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X	NA	
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	NA	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	OK	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x		
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x	NA	
53	Flange gap dimensions are within tolerances	x		
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x	OK	
60	Power conductors are not bunched together causing possible hot spots	x	OK	
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OK	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X	NA	
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	N/A	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OK	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X	NA	
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X		
28	Stopping boxes and cable boxes are corrected filled	X	NA	
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x	OK	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x	OK	
50	Cable glands are of the correct type and installed correctly	x	OK	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	OK	
52	Flame path are clean and undamaged	x	OK	
53	Flange gap dimensions are within tolerances	x	OK	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x		
71	Breathing operation is satisfactory (type "nR" only)	x	NA	
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
	Extra Ex p checks			
77	Pressurization gas is correct type	x		
78	Actual pressure is within maximum and minimum settings for equipment	x		
79	Timers set as per certification documentation	x	NA	
80	Alarms and trip functions operate correctly as per certification documentation	x		
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
82	Automatic electrical protective devices operate within permitted limits	x		
83	Automatic electrical protective devices are set correctly	x		
84	Protective gas inlet temperature is below maximum specified	x		
85	Ducts, pipes and enclosures are in good condition	x		
	General Equipment	**Detailed**	**OK/NA/PL**	**Comments**
86	Protective gas is substantially free from contaminants	x		
87	Protective gas pressure and/or flow is adequate	x		
88	Pressure and/or flow indicators, alarms and interlocks function correctly	x	NA	
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	x		
90	Specific conditions of use (if applicable) are complied with			
	Extra Ex i (Intrinsically Safe – IS) checks			
91	Equipment has adequate circuit identification for 'IS' Installation	x		
92	Cables are installed in accordance with the documentation	x		
93	Segregation is maintained between IS and non-IS Circuits	x		
94	Cable screens are isolated at one end (field side)	x		
95	Cable screens are earthed in accordance with the documentation	x		
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	x		
97	Equipment installed is the one specified in the documentation	x	NA	
98	Ambient temperature range of the apparatus is correct for the installation	x		
99	Service temperature range of the apparatus is correct for the installation	x		
100	Installation is clearly labelled	x		
101	Printed circuit boards are clean and undamaged	x		
102	The maximum voltage Um of the associated apparatus is not exceeded	x		
103	Point-to-point connections are all correct	x		
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	x		
105	Earth connections maintain the integrity of the type of protection	x		
106	Intrinsically safe circuit earthing is satisfactory	x		
107	Insulation resistance is satisfactory	x		
108	Short-circuit protection of the power supply is in accordance with the documentation	x

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OK	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X	NA	
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	NA	
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK

	TASK	HAZARDOUS AREA EQUIPMENT DETAILED INSPECTION			
Type (ELE/MEC)	H	TAG	PV-610	SYSTEM	C-63 ELECTROLYZER

Schedule Ref. #	94			Area Code		WP3			
Area Class Drawing				Manufacturer / Description		EMERSON / PNEUMATIC VALVE			
Model	T298			Serial Number		ZP24036667-0			
Drawing				Datasheet					
Cert No.	-			Equipment Ambient Temp.		-10 / +180°C			
Area Classification	IIC (IIB+H2)	Zone	2	Gas group	3G	Temp class	T1		
Equipment Protection Type	Ex h	EPL		Gas group	II 2G IIC	Temp class	Tx	IP Rating	0

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	PNEUMATIC
6	Equipment circuit identification is available	X	OK	PNEUMATIC
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	NA	
8	There is no damage or unauthorized modifications	X	NA	
9	There is no evidence of unauthorized modifications	X	NA	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	NA	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	NA	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	NA	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	NA	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X	NA	
21	HID lamps are not indicating EOL effects	X	NA	
22	Lamp type, rating, pin configuration and position are correct	X	NA	
23	Breathing and drainage devices are satisfactory	X	NA	
24	Type of cable is appropriate	X	NA	
25	There is no obvious damage to the cables	X	NA	
26	Cable glands are the correct type and installed correctly	X	NA	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	OK	
28	Stopping boxes and cable boxes are corrected filled	X	NA	
29	Integrity of conduit system and interface with mixed system maintained	x	NA	
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	NA	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	NA	
33	All cable cores are uniquely labeled	x	NA	
34	Cable cores not in use are correctly terminated	x	NA	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x		
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x	NA	
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x		
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x		
53	Flange gap dimensions are within tolerances	x		
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
	Extra Ex p checks			
77	Pressurization gas is correct type	x		
78	Actual pressure is within maximum and minimum settings for equipment	x		
79	Timers set as per certification documentation	x		
80	Alarms and trip functions operate correctly as per certification documentation	x		
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x	NA	
82	Automatic electrical protective devices operate within permitted limits	x		
83	Automatic electrical protective devices are set correctly	x		
84	Protective gas inlet temperature is below maximum specified	x		
85	Ducts, pipes and enclosures are in good condition	x		
	General Equipment	**Detailed**	**OK/NA/PL**	**Comments**
86	Protective gas is substantially free from contaminants	x		
87	Protective gas pressure and/or flow is adequate	x		
88	Pressure and/or flow indicators, alarms and interlocks function correctly	x		
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	x		
90	Specific conditions of use (if applicable) are complied with			
	Extra Ex i (Intrinsically Safe – IS) checks			
91	Equipment has adequate circuit identification for 'IS' Installation	x		
92	Cables are installed in accordance with the documentation	x		
93	Segregation is maintained between IS and non-IS Circuits	x		
94	Cable screens are isolated at one end (field side)	x		
95	Cable screens are earthed in accordance with the documentation	x		
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	x	NA	
97	Equipment installed is the one specified in the documentation	x		
98	Ambient temperature range of the apparatus is correct for the installation	x		
99	Service temperature range of the apparatus is correct for the installation	x		
100	Installation is clearly labelled	x		
101	Printed circuit boards are clean and undamaged	x		
102	The maximum voltage Um of the associated apparatus is not exceeded	x		
103	Point-to-point connections are all correct	x		
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	x		
105	Earth connections maintain the integrity of the type of protection	x		
106	Intrinsically safe circuit earthing is satisfactory	x		
107	Insulation resistance is satisfactory	x		
108	Short-circuit protection of the power supply is in accordance with the documentation	x

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	PNEUMATIC
6	Equipment circuit identification is available	X	OK	PNEUMATIC
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X		
8	There is no damage or unauthorized modifications	X		
9	There is no evidence of unauthorized modifications	X	NA	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	NA	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X		
15	Electrical connections are tight	X		
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X		
18	Encapsulated components are undamaged	X		
19	Flameproof components are undamaged	X		
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X		
25	There is no obvious damage to the cables	X		
26	Cable glands are the correct type and installed correctly	X		
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	OK	
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section		NA	
	Physical check	x		
31	Automated electric protective devices operate within permitted limits	x		
32	Special conditions (if applicable) have been complied with.	x		
33	All cable cores are uniquely labeled	x		
34	Cable cores not in use are correctly terminated	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x		
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x	NA	
53	Flange gap dimensions are within tolerances	x		
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x		
53	Flange gap dimensions are within tolerances	x		
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x	NA	
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x		
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x	NA	
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

Equipment Protection Type	Ex h	EPL		Gas group	II 2G IIC	Temp class	Tx	IP Rating	0		

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	PNEUM
6	Equipment circuit identification is available	X	OK	PNEUM
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X		
8	There is no damage or unauthorized modifications	X	NA	
9	There is no evidence of unauthorized modifications	X		
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured		NA	
	Physical check	X		
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X		
16	Bridging links do not reduce creepage / clearance and are allowed	X		
17	Unused terminals are tightened	X		
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X		
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X		
25	There is no obvious damage to the cables	X		
26	Cable glands are the correct type and installed correctly	X		
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	OK	
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section		NA	
	Physical check	x		
31	Automated electric protective devices operate within permitted limits	x		
32	Special conditions (if applicable) have been complied with.	x		
33	All cable cores are uniquely labeled	x		
34	Cable cores not in use are correctly terminated	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x

	TASK	HAZARDOUS AREA EQUIPMENT DETAILED INSPECTION			
Type (ELE/MEC)	M	TAG	PV-900	SYSTEM	C-63 ELECTROLYZER

Schedule Ref. #	105			Area Code		WP3			
Area Class Drawing				Manufacturer / Description		EMERSON / PNEUMATIC VALVE			
Model	T298			Serial Number		[]			
Drawing				Datasheet					
Cert No.	-			Equipment Ambient Temp.		-10 / +180°C			
Area Classification	IIC (IIB+H2)	Zone	2	Gas group	3G	Temp class	T1		
Equipment Protection Type	Ex h	EPL		Gas group	II 2G IIC	Temp class	Tx	IP Rating	0

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	PNEUM
6	Equipment circuit identification is available	X	OK	PNEUM
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X		
8	There is no damage or unauthorized modifications	X		
9	There is no evidence of unauthorized modifications	X	NA	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured		NA	
	Physical check	X		
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X		
16	Bridging links do not reduce creepage / clearance and are allowed	X		
17	Unused terminals are tightened	X	NA	
18	Encapsulated components are undamaged	X		
19	Flameproof components are undamaged	X		
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X		
25	There is no obvious damage to the cables	X		
26	Cable glands are the correct type and installed correctly	X		
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	OK	
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section		NA	
	Physical check	x		
31	Automated electric protective devices operate within permitted limits	x		
32	Special conditions (if applicable) have been complied with.	x		
33	All cable cores are uniquely labeled	x		
34	Cable cores not in use are correctly terminated	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x		
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x	NA	
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x		
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x		
53	Flange gap dimensions are within tolerances	x	NA	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
	Extra Ex p checks			
77	Pressurization gas is correct type	x		
78	Actual pressure is within maximum and minimum settings for equipment	x		
79	Timers set as per certification documentation	x		
80	Alarms and trip functions operate correctly as per certification documentation	x		
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x	NA	
82	Automatic electrical protective devices operate within permitted limits	x		
83	Automatic electrical protective devices are set correctly	x		
84	Protective gas inlet temperature is below maximum specified	x		
85	Ducts, pipes and enclosures are in good condition	x		
	General Equipment	**Detailed**	**OK/NA/PL**	**Comments**
86	Protective gas is substantially free from contaminants	x		
87	Protective gas pressure and/or flow is adequate	x		
88	Pressure and/or flow indicators, alarms and interlocks function correctly	x	NA	
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	x		
90	Specific conditions of use (if applicable) are complied with			
	Extra Ex i (Intrinsically Safe – IS) checks			
91	Equipment has adequate circuit identification for 'IS' Installation	x		
92	Cables are installed in accordance with the documentation	x		
93	Segregation is maintained between IS and non-IS Circuits	x		
94	Cable screens are isolated at one end (field side)	x	NA	
95	Cable screens are earthed in accordance with the documentation	x		
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	x		
97	Equipment installed is the one specified in the documentation	x		
98	Ambient temperature range of the apparatus is correct for the installation	x		
99	Service temperature range of the apparatus is correct for the installation	x		
100	Installation is clearly labelled	x		
101	Printed circuit boards are clean and undamaged	x		
102	The maximum voltage Um of the associated apparatus is not exceeded	x		
103	Point-to-point connections are all correct	x		
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	x		
105	Earth connections maintain the integrity of the type of protection	x		
106	Intrinsically safe circuit earthing is satisfactory	x		
107	Insulation resistance is satisfactory	x		
108	Short-circuit protection of the power supply is in accordance with the documentation	x

	TASK	HAZARDOUS AREA EQUIPMENT DETAILED INSPECTION			
Type (ELE/MEC)	H	TAG	PV-920	SYSTEM	C-63 ELECTROLYZER

	General Equipment	Detailed	OK/NA/PL	Comments
	Extra Ex p checks			
77	Pressurization gas is correct type	x		
78	Actual pressure is within maximum and minimum settings for equipment	x		
79	Timers set as per certification documentation	x		
80	Alarms and trip functions operate correctly as per certification documentation	x		
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
82	Automatic electrical protective devices operate within permitted limits	x		
83	Automatic electrical protective devices are set correctly	x		
84	Protective gas inlet temperature is below maximum specified	x		
85	Ducts, pipes and enclosures are in good condition	x		
	General Equipment	**Detailed**	**OK/NA/PL**	**Comments**
86	Protective gas is substantially free from contaminants	x		
87	Protective gas pressure and/or flow is adequate	x		
88	Pressure and/or flow indicators, alarms and interlocks function correctly	x		
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	x		
90	Specific conditions of use (if applicable) are complied with			
	Extra Ex i (Intrinsically Safe – IS) checks			
91	Equipment has adequate circuit identification for 'IS' Installation	x		
92	Cables are installed in accordance with the documentation	x		
93	Segregation is maintained between IS and non-IS Circuits	x		
94	Cable screens are isolated at one end (field side)	x		
95	Cable screens are earthed in accordance with the documentation	x		
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	x		
97	Equipment installed is the one specified in the documentation	x		
98	Ambient temperature range of the apparatus is correct for the installation	x		
99	Service temperature range of the apparatus is correct for the installation	x		
100	Installation is clearly labelled	x		
101	Printed circuit boards are clean and undamaged	x		
102	The maximum voltage Um of the associated apparatus is not exceeded	x		
103	Point-to-point connections are all correct	x		
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	x		
105	Earth connections maintain the integrity of the type of protection	x		
106	Intrinsically safe circuit earthing is satisfactory	x		
107	Insulation resistance is satisfactory	x		
108	Short-circuit protection of the power supply is in accordance with the documentation	x

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X		
8	There is no damage or unauthorized modifications	X	NA	
9	There is no evidence of unauthorized modifications	X		
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	NA	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X		
16	Bridging links do not reduce creepage / clearance and are allowed	X		
17	Unused terminals are tightened	X		
18	Encapsulated components are undamaged	X		
19	Flameproof components are undamaged	X		
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X	NA	
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X		
25	There is no obvious damage to the cables	X		
26	Cable glands are the correct type and installed correctly	X		
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X	OK	
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section		NA	
	Physical check	x		
31	Automated electric protective devices operate within permitted limits	x		
32	Special conditions (if applicable) have been complied with.	x		
33	All cable cores are uniquely labeled	x		
34	Cable cores not in use are correctly terminated	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x		
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x		
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x	NA	
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x		
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x		
53	Flange gap dimensions are within tolerances	x		
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x	NA	
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x		
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x		
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	NA	
52	Flame path are clean and undamaged	x		
53	Flange gap dimensions are within tolerances	x		
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x		
71	Breathing operation is satisfactory (type "nR" only)	x	NA	
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OM	
2	Equipment group is correct	X	OM	
3	Equipment temperature class is correct	X	OM	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OM	
5	Equipment circuit identification is correct	X	OM	
6	Equipment circuit identification is available	X	OM	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	NA	
8	There is no damage or unauthorized modifications	X	OM	
9	There is no evidence of unauthorized modifications	X	OM	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OM	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OM	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OM	
13	Condition of enclosure gaskets is satisfactory	X	OM	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OM	
15	Electrical connections are tight	X	OM	
16	Bridging links do not reduce creepage / clearance and are allowed	X		
17	Unused terminals are tightened	X		
18	Encapsulated components are undamaged	X		
19	Flameproof components are undamaged	X	NA	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X		
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OM	
26	Cable glands are the correct type and installed correctly	X	OM	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X		
28	Stopping boxes and cable boxes are corrected filled	X		
29	Integrity of conduit system and interface with mixed system maintained	x	NA	
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x		
31	Automated electric protective devices operate within permitted limits	x		
32	Special conditions (if applicable) have been complied with.	x	OM	
33	All cable cores are uniquely labeled	x	OM	
34	Cable cores not in use are correctly terminated	x	OM	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x	NA	
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x		
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x		
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x		
50	Cable glands are of the correct type and installed correctly	x		
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x		
52	Flame path are clean and undamaged	x	NA	
53	Flange gap dimensions are within tolerances	x		
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x		
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x	NA	
62	Insulation resistance (IR) of the motor windings is satisfactory	x		
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x

Schedule Ref. #	114			Area Code		WP3			
Area Class Drawing				Manufacturer / Description		Soldo Controls / LIMIT SWITCH			
Model	SK012			Serial Number		[]			
Drawing				Datasheet					
Cert No.	CML 19ATEX1359X			Equipment Ambient Temp.		-55 / +105°C			
Area Classification	IIC (IIB+H2)	Zone	2	Gas group	3G	Temp class	T1		
Equipment Protection Type	Ex db	EPL		Gas group	II 2GD IIC	Temp class	Tx	IP Rating	0

Detailed Note:

Inspection shall only be performed by competent personnel with competency verified by CrossWind

All fields are to be completed. Any non-applicable field shall state "NA". Comments are required for 'Failure' column ONLY.

An Inspection Sheet should be completed for EACH individual item of Equipment.

	General Equipment	Detailed	OK/NA/PL	Comments
1	Equipment is appropriate to the EPL / Zone requirements of the area	X	OK	
2	Equipment group is correct	X	OK	
3	Equipment temperature class is correct	X	OK	
4	Degree of IP protection of equipment is appropriate for the level of protection	X	OK	
5	Equipment circuit identification is correct	X	OK	
6	Equipment circuit identification is available	X	OK	
7	Enclosure glass parts and glass-to-metal sealing gaskets and / or compounds are satisfactory	X	OK	
8	There is no damage or unauthorized modifications	X	OK	
9	There is no evidence of unauthorized modifications	X	OK	
10	Bolts, cable entry devices (direct and indirect) & blanking elements are of the correct type, are complete & tight			
	Physical check	X	OK	
11	Threaded covers on enclosures are of the correct type, are tight and secured			
	Physical check	X	OK	
12	Joint surfaces are clean and undamaged and gaskets, if any, are satisfactory and positioned correctly	X	OK	
13	Condition of enclosure gaskets is satisfactory	X	OK	
14	There is no evidence or ingress of water or dust in the enclosure in accordance with the IP rating	X	OK	
15	Electrical connections are tight	X	OK	
16	Bridging links do not reduce creepage / clearance and are allowed	X	NA	
17	Unused terminals are tightened	X	OK	
18	Encapsulated components are undamaged	X	NA	
19	Flameproof components are undamaged	X	OK	
20	Fluorescent lamps are not indicating EOL effects (only for Ex "e" – Ex "n" – Ex "t")	X		
21	HID lamps are not indicating EOL effects	X	NA	
22	Lamp type, rating, pin configuration and position are correct	X		
23	Breathing and drainage devices are satisfactory	X		
24	Type of cable is appropriate	X	OK	
25	There is no obvious damage to the cables	X	OK	
26	Cable glands are the correct type and installed correctly	X	OK	
27	Sealing of trunking, ducts, pipes and or conduits is satisfactory	X		
28	Stopping boxes and cable boxes are corrected filled	X	NA	
29	Integrity of conduit system and interface with mixed system maintained	x		
30	Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section			
	Physical check	x	OK	
31	Automated electric protective devices operate within permitted limits	x	NA	
32	Special conditions (if applicable) have been complied with.	x	OK	
33	All cable cores are uniquely labeled	x	OK	
34	Cable cores not in use are correctly terminated	x	OK	

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	x	OK	
36	No undue accumulation of dust and dirt	x	OK	
37	All equipment housings are clean and dry	x	OK	
38	All moving parts are free and have no mechanical damage	x	NA	
	Applicable for Installation of Heating Systems			
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	x		
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	x	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	x		
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	x		
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	x		
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	x		
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	x		
	Extra Ex d checks			
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	x	OK	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	x	OK	
50	Cable glands are of the correct type and installed correctly	x	OK	
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	x	OK	
52	Flame path are clean and undamaged	x	OK	
53	Flange gap dimensions are within tolerances	x	OK	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
55	The ventilation airflow is not impeded	x	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	x		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
58	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex e checks			
59	All Equipment is Ex e certified (including components within enclosure)	x		
60	Power conductors are not bunched together causing possible hot spots	x		
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	x		
62	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
64	The ventilation airflow is not impeded	x		
65	Motor protection devices operate within the permitted tE or tA time limits.	x		
66	Variable voltage/frequency installation complies with documentation	x		
	Extra Ex n (nR, nL) checks			
67	All Terminals are Ex n certified (if required on certificate)	x		
68	Hermetically sealed and enclosed break devices are undamaged	x		
69	Restricted breathing properties satisfactory (conduct vacuum test)	x		
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x		
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x		
73	The undamaged,ventilation motorairflow is foundationsnot impededhave	x		
74	Insulation resistance (IR) of the motor windings is satisfactory	x		
75	Motor protection devices operate within the permitted tE or tA time limits.	x		
76	Variable voltage/frequency installation complies with documentation	x		

REFER TO FINAL SHEET FOR ACCEPTANCE

	General Equipment	Detailed	OK/NA/PL	Comments
	Extra Ex p checks			
77	Pressurization gas is correct type	x		
78	Actual pressure is within maximum and minimum settings for equipment	x		
79	Timers set as per certification documentation	x		
80	Alarms and trip functions operate correctly as per certification documentation	x	NA	
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x		
82	Automatic electrical protective devices operate within permitted limits	x		
83	Automatic electrical protective devices are set correctly	x		
84	Protective gas inlet temperature is below maximum specified	x		
85	Ducts, pipes and enclosures are in good condition	x		
	General Equipment	**Detailed**	**OK/NA/PL**	**Comments**
86	Protective gas is substantially free from contaminants	x		
87	Protective gas pressure and/or flow is adequate	x		
88	Pressure and/or flow indicators, alarms and interlocks function correctly	x	NA	
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	x		
90	Specific conditions of use (if applicable) are complied with			
	Extra Ex i (Intrinsically Safe – IS) checks			
91	Equipment has adequate circuit identification for 'IS' Installation	x		
92	Cables are installed in accordance with the documentation	x		
93	Segregation is maintained between IS and non-IS Circuits	x		
94	Cable screens are isolated at one end (field side)	x		
95	Cable screens are earthed in accordance with the documentation	x		
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	x	NA	
97	Equipment installed is the one specified in the documentation	x		
98	Ambient temperature range of the apparatus is correct for the installation	x		
99	Service temperature range of the apparatus is correct for the installation	x		
100	Installation is clearly labelled	x		
101	Printed circuit boards are clean and undamaged	x		
102	The maximum voltage Um of the associated apparatus is not exceeded	x		
103	Point-to-point connections are all correct	x		
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	x		
105	Earth connections maintain the integrity of the type of protection	x		
106	Intrinsically safe circuit earthing is satisfactory	x		
107	Insulation resistance is satisfactory	x		
108	Short-circuit protection of the power supply is in accordance with the documentation	x

(1) AMBIENT TEMPERATURE NOT SUITABLE ITEM -20/+40°C -> WP3 AMBIENT T° +5/+45°C

	General Equipment	Detailed	OK/NA/PL	Comments
31	Automated electric protective devices operate within permitted limits	X	NA	/
32	Special conditions (if applicable) have been complied with.	X		/
33	All cable cores are uniquely labeled	X	OK	/
34	Cable cores not in use are correctly terminated	X	NA	/
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	X	OK	/
36	No undue accumulation of dust and dirt	X	OK	/
37	All equipment housings are clean and dry	X	OK	/
38	All moving parts are free and have no mechanical damage	X	NA	/
Applicable for Installation of Heating Systems				
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	X	NA	/
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	X	NA	/
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	X	NA	/
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	X	NA	/
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	X	NA	/
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	X	NA	/
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	X	NA	/
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	X	NA	/
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	X	NA	/
Extra Ex d checks				
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	X	OK	/
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	X	OK	/
50	Cable glands are of the correct type and installed correctly	X	OK	/
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	X	NA	/
52	Flame path are clean and undamaged	X	OK	/
53	Flange gap dimensions are within tolerances	X	OK	/
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	X		/
55	The ventilation airflow is not impeded	X	NA	/
56	Insulation resistance (IR) of the motor windings is satisfactory	X		/
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X		/
58	Variable voltage/frequency installation complies with documentation	X		/
Extra Ex e checks				
59	All Equipment is Ex e certified (including components within enclosure)	X	NA	/
60	Power conductors are not bunched together causing possible hot spots	X	NA	/
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	X	NA	/
62	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
64	The ventilation airflow is not impeded	X	NA	/
65	Motor protection devices operate within the permitted tE or tA time limits.	X	NA	/
66	Variable voltage/frequency installation complies with documentation	X	NA	/
Extra Ex n (nR, nL) checks				
67	All Terminals are Ex n certified (if required on certificate)	X	NA	/
68	Hermetically sealed and enclosed break devices are undamaged	X	NA	/
69	Restricted breathing properties satisfactory (conduct vacuum test)	X	NA	/
70	Test port, if fitted, is functional (type "nR" only)	X	NA	/
71	Breathing operation is satisfactory (type "nR" only)	X	NA	/
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	X	NA	/
73	The ventilation airflow is not impeded.	X	NA	/
74	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
75	Motor protection devices operate within the permitted tE or tA time limits	X	NA	/
76	Variable voltage/frequency installation complies with documentation	X	NA	/

Extra Ex p checks				
77	Pressurization gas is correct type	X	NA	/
78	Actual pressure is within maximum and minimum settings for equipment	X	NA	/
79	Timers set as per certification documentation	X	NA	/
80	Alarms and trip functions operate correctly as per certification documentation	X	NA	/
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
82	Automatic electrical protective devices operate within permitted limits	X	NA	/
83	Automatic electrical protective devices are set correctly	X	NA	/
84	Protective gas inlet temperature is below maximum specified	X	NA	/
85	Ducts, pipes and enclosures are in good condition	X	NA	/
86	Protective gas is substantially free from contaminants	X	NA	/
87	Protective gas pressure and/or flow is adequate	X	NA	/
88	Pressure and/or flow indicators, alarms and interlocks function correctly	X	NA	/
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	X	NA	/
90	Specific conditions of use (if applicable) are complied with		NA	/
Extra Ex i (Intrinsically Safe – IS) checks				
91	Equipment has adequate circuit identification for 'IS' Installation	X	NA	/
92	Cables are installed in accordance with the documentation	X	NA	/
93	Segregation is maintained between IS and non-IS Circuits	X	NA	/
94	Cable screens are isolated at one end (field side)	X	NA	/
95	Cable screens are earthed in accordance with the documentation	X	NA	/
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	X	NA	/
97	Equipment installed is the one specified in the documentation	X	NA	/
98	Ambient temperature range of the apparatus is correct for the installation	X	NA	/
99	Service temperature range of the apparatus is correct for the installation	X	NA	/
100	Installation is clearly labelled	X	NA	/
101	Printed circuit boards are clean and undamaged	X	NA	/
102	The maximum voltage Um of the associated apparatus is not exceeded	X	NA	/
103	Point-to-point connections are all correct	X	NA	/

(1) AMBIENT TEMPERATURE NOT SUITABLE ITEM: -20/40 <-> WP3 AMBIENT T° +5/+45°C

	General Equipment	Detailed	OK/NA/PL	Comments
31	Automated electric protective devices operate within permitted limits	X	NA	/
32	Special conditions (if applicable) have been complied with.	X		/
33	All cable cores are uniquely labeled	X	OK	/
34	Cable cores not in use are correctly terminated	X	NA	/
35	Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	X	OK	/
36	No undue accumulation of dust and dirt	X	OK	/
37	All equipment housings are clean and dry	X	OK	/
38	All moving parts are free and have no mechanical damage	X	NA	/
Applicable for Installation of Heating Systems				
39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	X	NA	/
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	X	NA	/
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	X	NA	/
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	X	NA	/
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	X	NA	/
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	X	NA	/
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	X	NA	/
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	X	NA	/
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	X	NA	/
Extra Ex d checks				
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	X	NA	/
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	X	NA	/
50	Cable glands are of the correct type and installed correctly	X	NA	/
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	X	NA	/
52	Flame path are clean and undamaged	X	NA	/
53	Flange gap dimensions are within tolerances	X	NA	/
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	X	NA	/
55	The ventilation airflow is not impeded	X	NA	/
56	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
58	Variable voltage/frequency installation complies with documentation	X	NA	/
Extra Ex e checks				
59	All Equipment is Ex e certified (including components within enclosure)	X	NA	/
60	Power conductors are not bunched together causing possible hot spots	X	NA	/
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	X	NA	/
62	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
64	The ventilation airflow is not impeded	X	NA	/
65	Motor protection devices operate within the permitted tE or tA time limits.	X	NA	/
66	Variable voltage/frequency installation complies with documentation	X	NA	/
Extra Ex n (nR, nL) checks				
67	All Terminals are Ex n certified (if required on certificate)	X	OK	/
68	Hermetically sealed and enclosed break devices are undamaged	X	NA	/
69	Restricted breathing properties satisfactory (conduct vacuum test)	X		/
70	Test port, if fitted, is functional (type "nR" only)	X	OK	/
71	Breathing operation is satisfactory (type "nR" only)	X	OK	/
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	X		/
73	The ventilation airflow is not impeded.	X		/
74	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	/
75	Motor protection devices operate within the permitted tE or tA time limits	X		/
76	Variable voltage/frequency installation complies with documentation	X		/

Extra Ex p checks				
77	Pressurization gas is correct type	X	NA	/
78	Actual pressure is within maximum and minimum settings for equipment	X	NA	/
79	Timers set as per certification documentation	X	NA	/
80	Alarms and trip functions operate correctly as per certification documentation	X	NA	/
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X	NA	/
82	Automatic electrical protective devices operate within permitted limits	X	NA	/
83	Automatic electrical protective devices are set correctly	X	NA	/
84	Protective gas inlet temperature is below maximum specified	X	NA	/
85	Ducts, pipes and enclosures are in good condition	X	NA	/
86	Protective gas is substantially free from contaminants	X	NA	/
87	Protective gas pressure and/or flow is adequate	X	NA	/
88	Pressure and/or flow indicators, alarms and interlocks function correctly	X	NA	/
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	X	NA	/
90	Specific conditions of use (if applicable) are complied with		NA	/
Extra Ex i (Intrinsically Safe – IS) checks				
91	Equipment has adequate circuit identification for 'IS' Installation	X	NA	/
92	Cables are installed in accordance with the documentation	X	NA	/
93	Segregation is maintained between IS and non-IS Circuits	X	NA	/
94	Cable screens are isolated at one end (field side)	X	NA	/
95	Cable screens are earthed in accordance with the documentation	X	NA	/
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	X	NA	/
97	Equipment installed is the one specified in the documentation	X	NA	/
98	Ambient temperature range of the apparatus is correct for the installation	X	NA	/
99	Service temperature range of the apparatus is correct for the installation	X	NA	/
100	Installation is clearly labelled	X	NA	/
101	Printed circuit boards are clean and undamaged	X	NA	/
102	The maximum voltage Um of the associated apparatus is not exceeded	X	NA	/
103	Point-to-point connections are all correct	X	NA	/
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	X	NA	/
105	Earth connections maintain the integrity of the type of protection	X	NA	/
106	Intrinsically safe circuit earthing is satisfactory	X	NA	/
107	Insulation resistance is satisfactory	X	NA	/
108	Short-circuit protection of the power supply is in accordance with the documentation	X	NA	/

Remarks: Initial inspection should be detailed and carried out before equipment is brought into service as per IEC 60079-17	**Please mark only one box as appropriate**

39	Temperature sensors function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	X	NA	
40	Safety cut off devices function according to manufacturer's documents (only applicable for Ex-d e Ex-e)	X	NA	
41	The setting of the safety cut off is sealed (only applicable for Ex-d e Ex-e)	X	NA	
42	Reset of a heating system safety cut off possible with tool only(only applicable for Ex-d e Ex-e)	X	NA	
43	Auto-reset is not possible (only applicable for Ex-d e Ex-e)	X	NA	
44	Reset of a safety cut off under fault conditions is prevented (only applicable for Ex-d e Ex-e)	X	NA	
45	Safety cut off independent from control system (only applicable for Ex-d e Ex-e)	X	NA	
46	Level switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	X	NA	
47	Flow switch is installed and correctly set, if required (only applicable for Ex-d e Ex-e)	X	NA	
Extra Ex d checks				
48	Obstructions adjacent to flame proof flanged joints are in accordance with IEC 60079-14	X	OK	
49	Ex d conduits seals are fitted to all conduits and satisfactorily sealed	X	NA	
50	Cable glands are of the correct type and installed correctly	X	OK	APPLICABLE ONLY FOR HE64.1
51	Adaptors, reducers, stop ends, etc. are all certified Ex d	X	OK	
52	Flame path are clean and undamaged	X	OK	
53	Flange gap dimensions are within tolerances	X	OK	
54	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	X		
55	The ventilation airflow is not impeded	X	NA	
56	Insulation resistance (IR) of the motor windings is satisfactory	X		
57	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X		
58	Variable voltage/frequency installation complies with documentation	X		
Extra Ex e checks				
59	All Equipment is Ex e certified (including components within enclosure)	X	OK	APPLICABLE ONLY FOR JB1 & JB1.1
60	Power conductors are not bunched together causing possible hot spots	X	OK	
61	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are undamaged, motor foundations have no indentations or cracks	X		
62	Insulation resistance (IR) of the motor windings is satisfactory	X	NA	
63	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	X		
64	The ventilation airflow is not impeded	X		
65	Motor protection devices operate within the permitted tE or tA time limits.	X		
66	Variable voltage/frequency installation complies with documentation	X		
Extra Ex n (nR, nL) checks				
67	All Terminals are Ex n certified (if required on certificate)	x	NA	
68	Hermetically sealed and enclosed break devices are undamaged	x	NA	
69	Restricted breathing properties satisfactory (conduct vacuum test)	x	NA	
70	Test port, if fitted, is functional (type "nR" only)	x	NA	
71	Breathing operation is satisfactory (type "nR" only)	x	NA	
72	Motor fans have sufficient clearance to the enclosure and/or covers, cooling systems are	x	NA	
73	The ventilation airflow is not impeded.	x	NA	
74	Insulation resistance (IR) of the motor windings is satisfactory	x	NA	
75	Motor protection devices operate within the permitted tE or tA time limits	x	NA	
76	Variable voltage/frequency installation complies with documentation	x	NA	

Extra Ex p checks					
77	Pressurization gas is correct type	x	NA		
78	Actual pressure is within maximum and minimum settings for equipment	x	NA		
79	Timers set as per certification documentation	x	NA		
80	Alarms and trip functions operate correctly as per certification documentation	x	NA		
81	Fault loop impedance (TN systems) or earthing resistance (IT systems) is satisfactory	x	NA		
82	Automatic electrical protective devices operate within permitted limits	x	NA		
83	Automatic electrical protective devices are set correctly	x	NA		
84	Protective gas inlet temperature is below maximum specified	x	NA		
85	Ducts, pipes and enclosures are in good condition	x	NA		
86	Protective gas is substantially free from contaminants	x	NA		
87	Protective gas pressure and/or flow is adequate	x	NA		
88	Pressure and/or flow indicators, alarms and interlocks function correctly	x	NA		
89	Conditions of spark and particle barriers of ducts for exhausting the gas in hazardous area are satisfactory	x	NA		
90	Specific conditions of use (if applicable) are complied with		NA		
Extra Ex i (Intrinsically Safe – IS) checks					
91	Equipment has adequate circuit identification for 'IS' Installation	X	OM		
92	Cables are installed in accordance with the documentation	X	OM		APPLICABLE
93	Segregation is maintained between IS and non-IS Circuits	X	OM		ONLY FOR
94	Cable screens are isolated at one end (field side)	X	OM		TT XX
95	Cable screens are earthed in accordance with the documentation	X	OM		68 XX
96	Safety barrier units, relays and other energy limiting devices are of the approved type, installed in	X	OM		PT 64.1
97	Equipment installed is the one specified in the documentation	X	OM		TS 64.3 & 66.4
98	Ambient temperature range of the apparatus is correct for the installation	X	OM		FC 64.1
99	Service temperature range of the apparatus is correct for the installation	X	OM		JB 2
100	Installation is clearly labelled	X	OM		
101	Printed circuit boards are clean and undamaged	X	OM		
102	The maximum voltage Um of the associated apparatus is not exceeded	X	OM		
103	Point-to-point connections are all correct	X	OM		
104	Earth continuity is satisfactory (e.g. connections are tight, conductors are of sufficient cross-section)	X	OM		
105	Earth connections maintain the integrity of the type of protection	X	OM		
106	Intrinsically safe circuit earthing is satisfactory	X	OM		
107	Insulation resistance is satisfactory	X	OM		
108	Short-circuit protection of the power supply is in accordance with the documentation	X	OM		

Remarks: Initial inspection should be detailed and carried out before equipment is brought into service as per IEC 60079-17	**Please mark only one box as appropriate**

PROTEO ENGINEERING GROUP

Order: W240716

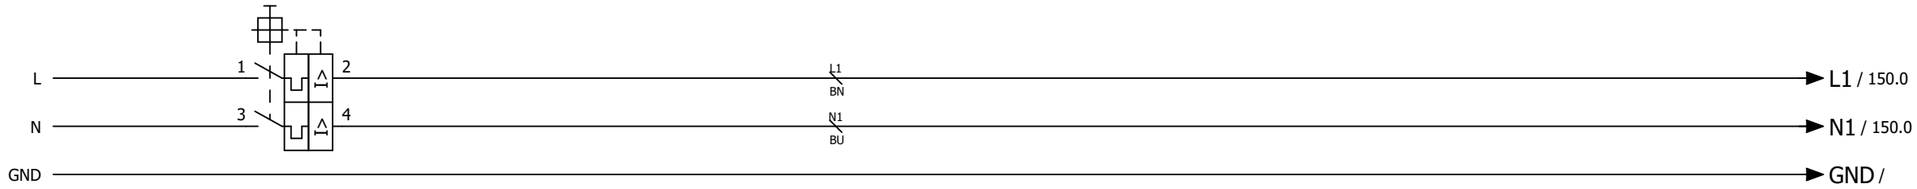
Customer: FORES ENGENEERING

Date: 05/02/2025

Revision: 03

Title: ELECTRICAL CABINET - RIO1

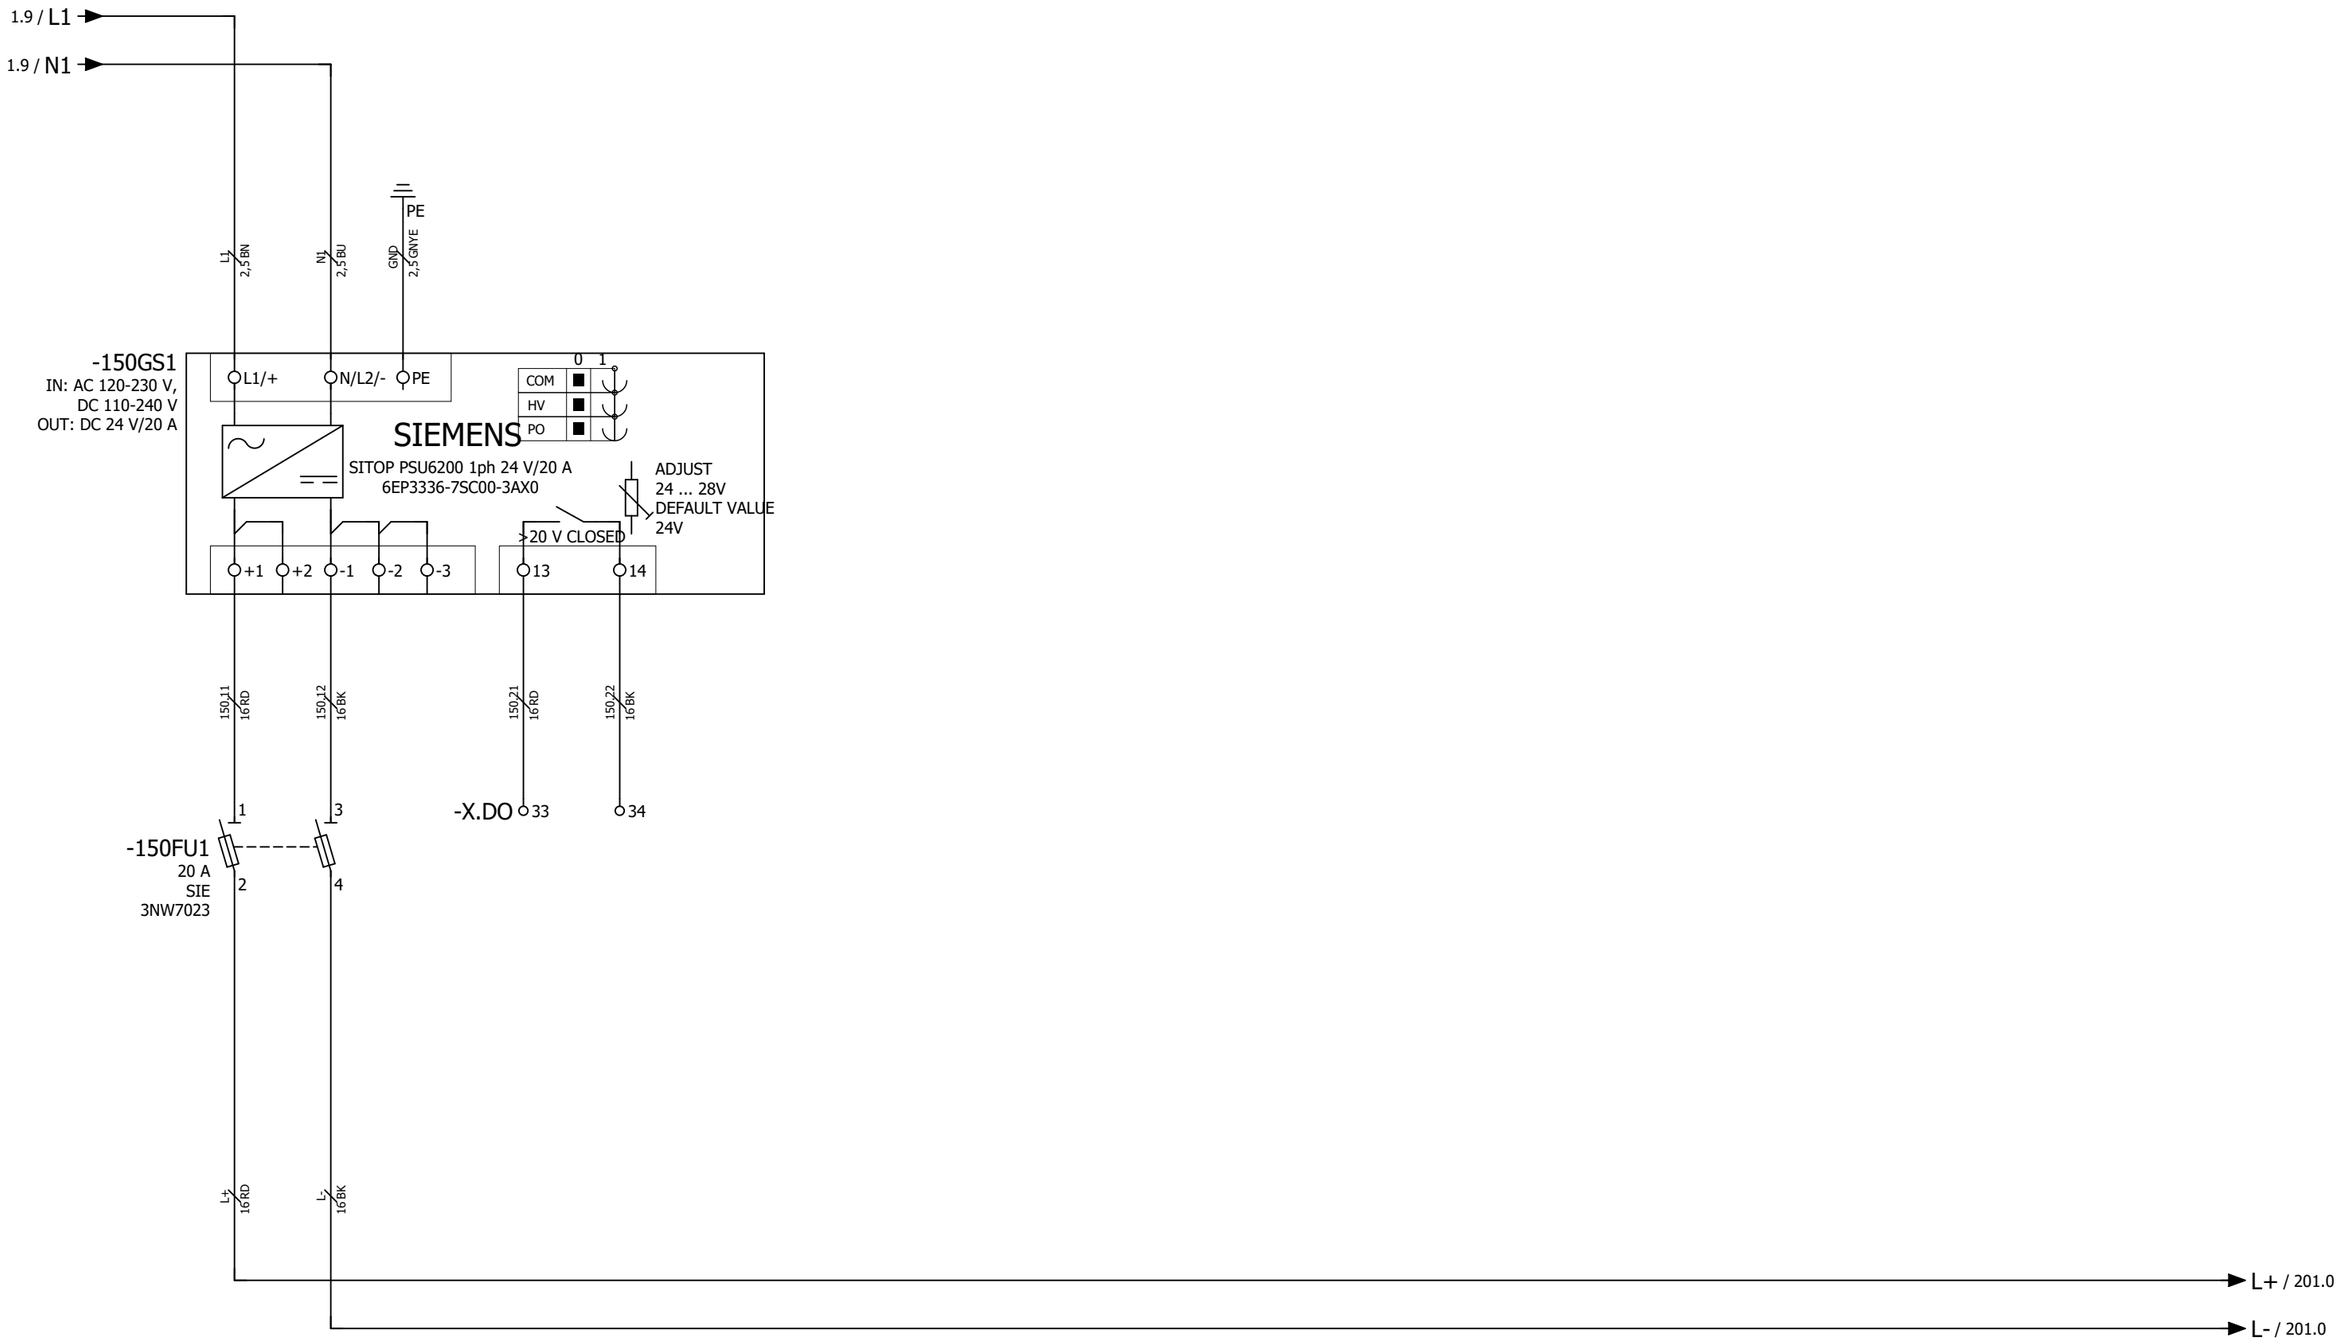
Editing: Proteo



Signature: Proteo

ELECTRICAL DIAGRAM:

File: D240934SCH02



Structure thickness	1,5 mm
Structure material	Sheet Metal
Standard of Construction	CEI EN 61439-2
Equipment Name	RIO Panel WP1
Equipment TAG	Q.RIO1
Year of construction	2024
Rated operational voltage	220 Vca
Nominal Frequency	50 Hz
Rated current (InA)	2 A
Short circuit current (Icc)	6 kA
Auxiliary voltage (EAUX)	24 Vdc
Degree of protection	IP 65
Dimensions HxWxD	1400x600x300
Cable entry	From side and bottom

From Control Cabinet
TAG: 20-UCP-001
Doc. C0063-FOR-DGM-EL-003 Pag.131
Cable 3G2,5

-1QF3

Order: W240716
File: D240934SCH03

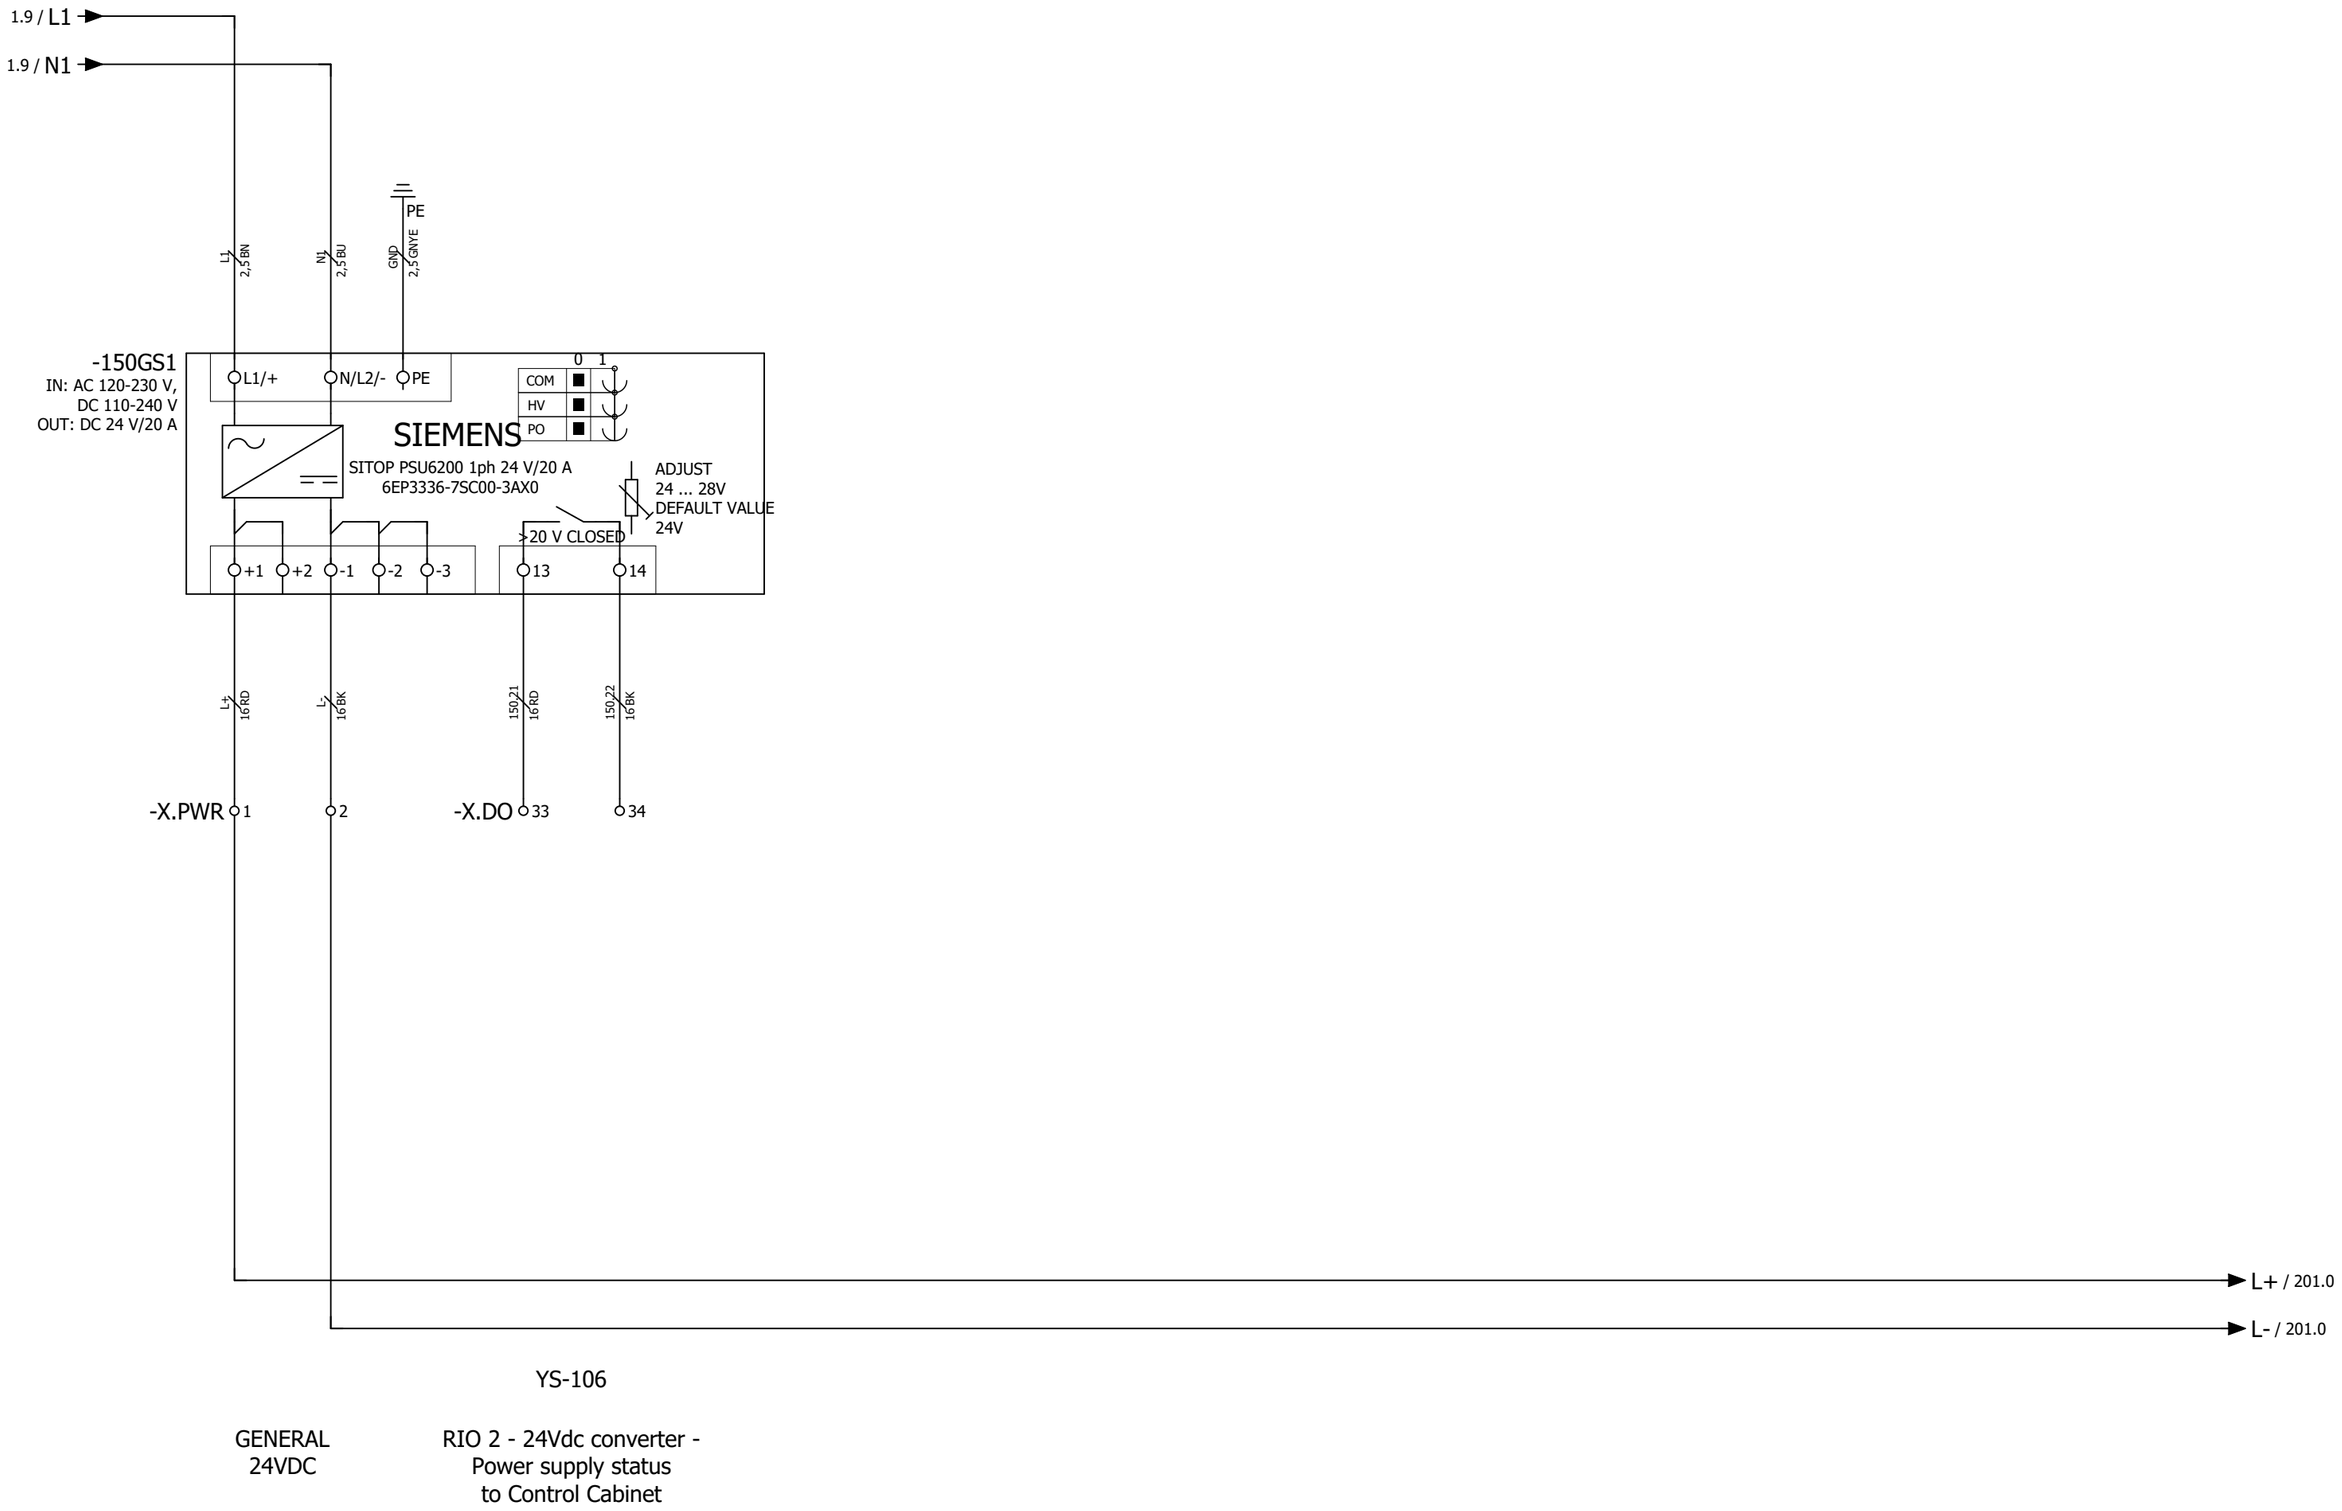
Scheme: D240934SCH03

Sheet: 0 | Next: 0.a



Tot. Sheet: 60

Structure thickness	1,5 mm
Structure material	Sheet Metal
Standard of Construction	CEI EN 61439-2
Equipment Name	RIO Panel WP3
Equipment TAG	Q.RIO2
Year of construction	2024
Rated operational voltage	220 Vca
Nominal Frequency	50 Hz
Rated current (InA)	1,3 A
Auxiliary voltage (EAUX)	24 Vdc
Degree of protection	Ex II 3 GD Ex ec IIC T6 Gc IP66
Dimensions HxWxD	1400x600x300
Cable entry	From side and bottom

From Control Cabinet
TAG: 20-UCP-001
Doc. C0063-FOR-DGM-EL-003 Pag.131
Cable 3G2,5

ATTACHMENT_3_C0063-FOR-DGM-EL-003_Rev.02_HeatTracingJB

GENERAL INFORMATION:

1. JB-82 IS DESIGNED TO CONNECT POWER TO UP TO THREE BTV, QTVR, XTV, KTV, HTV OR VPL EHT CABLES.

TECHNICAL BRIEF:

- 4 x M25 THREADED ENTRIES
- 4 x M25 STOPPING PLUGS
- 1 x M25 POWER CABLE GLAND

TYPICAL FOR:
- EHT-1007
- EHT-1008
- EHT-1009
- EHT-1010

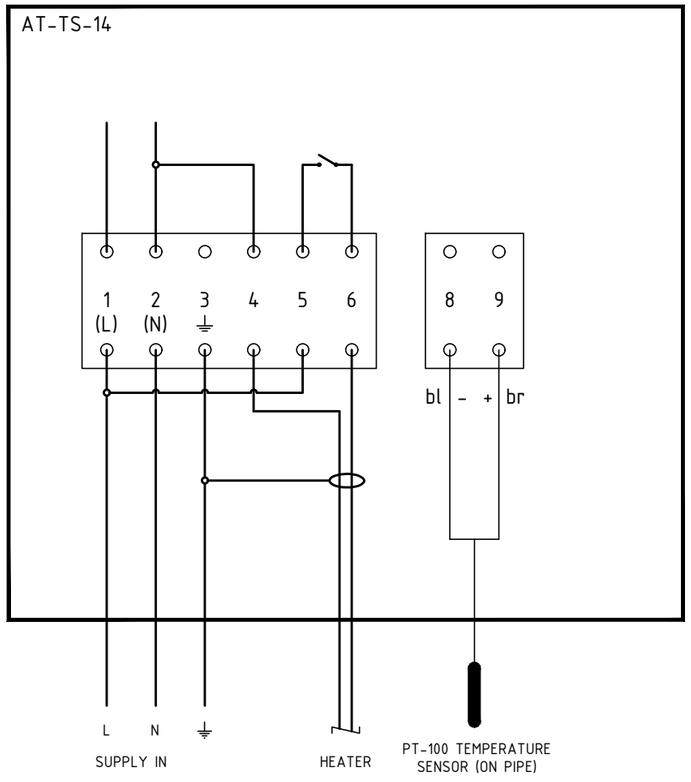
30



GENERAL INFORMATION:

1. THE ELECTRONIC SURFACE SENSING THEROMOSTAT PROVIDES ACCURATE TEMPERATURE CONTROL FOR HEATING CABLES.
2. THE UNIT CAN BE SUPPLIED AT NORMAL VOLTAGES OF 230V, 50/60Hz AND HAVE A DOUBLE-POLE SWITCH RATED AT 16A.
3. FOR PIPE TEMPERATURES UP TO 120°C, THE UNITS CAN BE MOUNTED ON THE PIPE USING A SUPPORT BRACKET.
4. THERMOSTAT SET-POINT RANGES BETWEEN 0°C TO 120°C.

TECHNICAL BRIEF:

- 1 x M20 FOR SUPPLY CABLE (Ø 8-13 mm)
- 1 x M25 FOR HEATING ELEMENT (Ø 11-17 mm)
- 1 x M16 FOR THE SENSOR
- 2 WIRE PT-100, SILICONE SENSOR, 3m.
- TERMINALS FOR 2.5mm² CORES.

AT-TS-14

TYPICAL FOR:
- EHT-1001
- EHT-1002
- EHT-1004
- EHT-1005
- EHT-1006

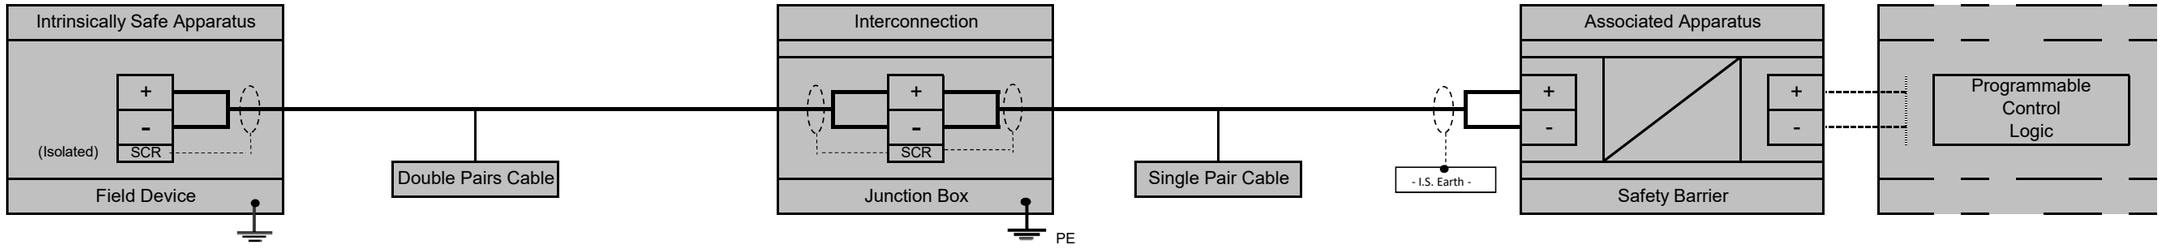
Field Device	
Field Device Type	KRONHE / OPTISWITCH 6600C
Approved Certificate	TUV 16 ATEX 182791X
Rating	Ex ia IIC T5/T4 Ga
Max Allowed Voltage - V_i	30 [V]
Max Allowed Current - Ii	100 [mA]
Max Allowed Power - Pi	750 [mW]
Resistance - R3	300 [ohm]
Inductance - L3	0,01 [mH]
Capacitance - C3	43 [nF]

Double Pairs Cable		
Manufacturer	Sensitherm	
Code	FG16OHM16	
Composition	4x0,75 + Sh	
Insulation Voltage	0,6/1 [kV]	
Resistance - R	26,7	[Ω/Km]
Inductance - L	0,9	[mH/Km]
Capacitance - C	200	[nF/Km]
L/R Ratio	0,0337079	[mH/Ω]

Single Pair Cable		
Manufacturer	Sensitherm	
Code	FG16OHM16	
Composition	2x1.5+Sh	
Insulation Voltage	0,6/1 [kV]	
Resistance - R	13,3	[Ω/Km]
Inductance - L	0,9	[mH/Km]
Capacitance - C	200	[nF/Km]
L/R Ratio	0,0676692	[mH/Ω]



Safety Barrier (Galvanic Type)	
Limiting Device Type	BAUMER - APPROFSIS3-B25100
Approved Certificate	LCIE 03ATEX 6078X
Rating	-
Max Output Voltage - V_0	25,2 [V]
Max Short Circuit - I_0	99 [mA]
Max Allowed Power - P_0	623 [mW]
Max Allowed Inductance - L_0	3 [mH]
Max Allowed Capacitance - C_0	107 [nF]

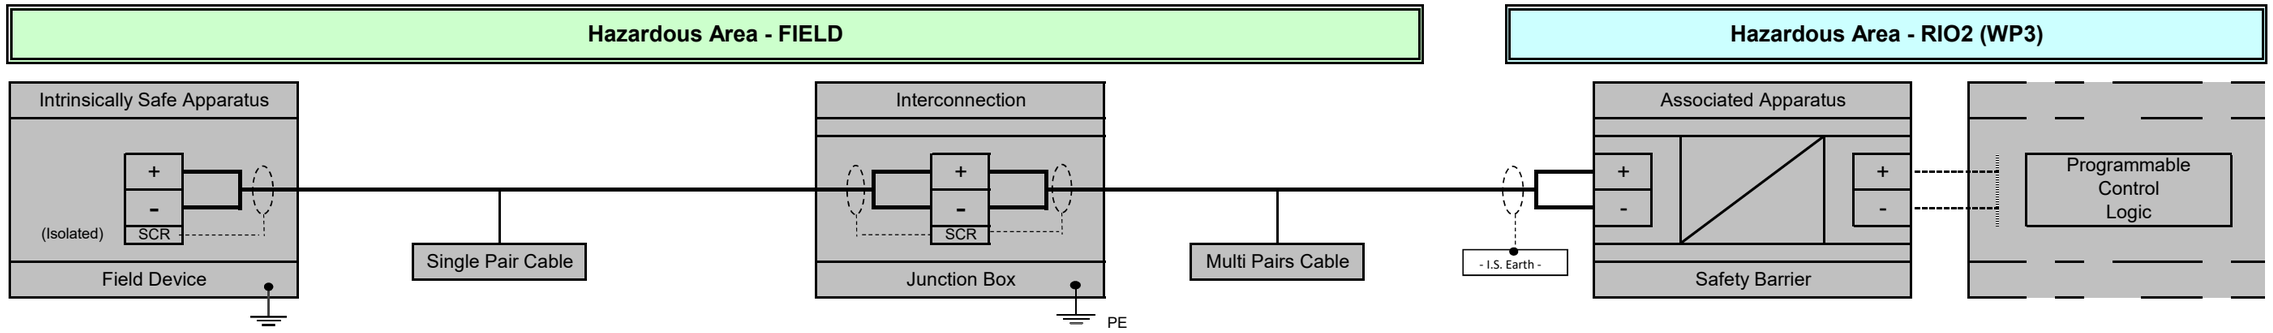
HPP-700 - POSITION AND TEMPERATURE SWITCH

Field Device	
Field Device Type	SRBG-C1-N-20N-ZC-M12-EX5
Approved Certificate	TUV 16 ATEX 174269 X
Rating	Ex ia IIC T1...T6 Ga
Max Allowed Voltage - V_i	15 [V]
Max Allowed Current - Ii	52 [mA]
Max Allowed Power - Pi	169 [mW]
Resistance - R3	288 [ohm]
Inductance - L3	0,02 [mH]
Capacitance - C3	10 [nF]



Single Pair Cable		
Manufacturer	Sensitherm	
Code	FG16OHM16	
Composition	1x1x0,75 + Sh	
Insulation Voltage	0,6/1 [kV]	
Resistance - R	26,7	[Ω/Km]
Inductance - L	0,9	[mH/Km]
Capacitance - C	200	[nF/Km]
L/R Ratio	0,0337079	[mH/Ω]

Multi Pairs Cable		
Manufacturer	Sensitherm	
Code	FG16OHM16	
Composition	1x(19x0,75) + Sh	
Insulation Voltage	0,6/1 [kV]	
Resistance - R	26,7	[Ω/Km]
Inductance - L	0,9	[mH/Km]
Capacitance - C	200	[nF/Km]
L/R Ratio	0,0337079	[mH/Ω]

Safety Barrier (Galvanic Type)	
Limiting Device Type	PHOENIX MACX MCR-EX-SL-NAM-R
Approved Certificate	IBExU 07 ATEX 1069 X
Rating	II 3 (1) G Ex ec [ia Ga] IIC T4
Max Output Voltage - V_0	9,6 [V]
Max Short Circuit - I_0	10 [mA]
Max Allowed Power - P_0	25 [mW]
Max Allowed Inductance - L_0	300 [mH]
Max Allowed Capacitance - C_0	3600 [nF]
