This document undergoes an issuance cycle within EDMS Fusionlive". Its distribution is electronically controlled. Once printed shall be considered as "NOT CONTROLLED" copy

1 INTRODUCTION AND INSTRUCTIONS FOR USE

This dossier compiles the Ultrasonic Testing (UT) reports and related certificates for the structural components supplied within the BLPH project.

It has been organised to support both structured navigation and efficient, targeted information retrieval.

Guidance on how to consult and interpret the reports—starting from the Welding Register—is provided in the document IDL-PRQ-02 Welding Register & NDT Report Interpretation, attached herein.

NOTE: Whenever the Welding Register indicates:

- Ref. Dossier Scandiuzzi
- Ref. Dossier Cimolai
- Ref. Dossier Sidertaglio

reference shall be made to the document "STRUCTURE WELDING LOG AND NDE REPORTS – EXTERNAL WORKSHOP" (123A90-PML-QC-DB-00014).

This document compiles the Welding Log together with the relevant NDE certificates issued by the above-mentioned suppliers.

This document undergoes an issuance cycle within EDMS Fusionlive". Its distribution is electronically controlled. Once printed shall be considered as "NOT CONTROLLED" copy

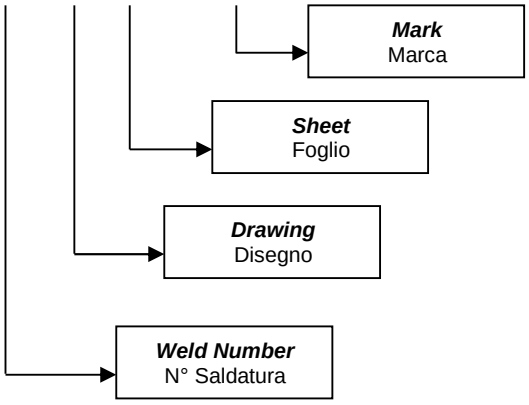
2 IDL-PRQ-02 WELDING REGISTER & NDT REPORT INTERPRETATION

This document undergoes an issuance cycle within EDMS Fusionlive". Its distribution is electronically controlled. Once printed shall be considered as "NOT CONTROLLED" copy

Rev.	*Data*	*Descrizione*	*Preparato da*	*Approvato da*
2015-00	21.01.2015	Prima Emissione / First Issue	F. Scialpi	D. Depasquale
2020-00	13.01.2020	General revision	C. Gemignani	D. Depasquale
2023-00	23.08.2023	General revision	A. Galesi	D. Depasquale
2025-00	18.09.2025	General revision	A. Galesi	D. Depasquale

1. SCOPE/SCOPO

The following instruction provides useful clarifications for reading the print of the weld register relative to the identification of the welds, welder punches, controls, etc.
Furthermore, it provides a reading key for some codes indicated in the Non-Destructive Test reports.



La seguente istruzione fornisce chiarimenti utili per la lettura della stampa del registro saldature relativamente ad identificazione delle saldature, punzoni saldatori, controlli, ecc.
Inoltre, fornisce una chiave di lettura relativamente ad alcuni codici indicati sui report dei Controlli Non Distruttivi.

2. ROSETTI WELDS/SALDATURE ROSETTI

Starting from the construction drawings, with the welds map, issue by Rosetti (see Attached 1A for structures and 1B for piping) it is possible to identify the weld.
On the welding register the identification is reported as in the example below.

Partendo dai disegni costruttivi con la mappa delle saldature emessi da Rosetti (vedi allegato 1A per le strutture e 1B per il piping) è possibile individuare la saldatura.
Sul registro l'identificativo della saldatura è riportato come all'esempio sotto.

7 / 178 / 1 / DJA006

Following the welding number are show: drawing revision, production date, welder stamp, item type (tab. A), item size (it is the size indicated in the descriptive part of the table of materials), thickness (s), geometry of the bevel, welding length, production (prefabrication/erection/offshore), kind of material, WPS, weld technique, connection type and weld acceptance date.
Under this string are listed all the checks that must be performed on the weld (tab. B) with specified near the phase, the Job Instruction used, the operator performing the check, the extension, the number the date of the reports, the judgment (tab. C), the length of any repairs and the WPS to execute them.

ELECTRONIC DOCUMENT: ONCE PRINTED IT IS NOT CONTROLLED AND MAY BECOME OUTDATED

Di seguito al numero di saldatura sono riportati: revisione del disegno, data di produzione, punzone saldatore, tipo pezzo (tab. A), dimensione pezzo (è la misura indicata nella parte descrittiva della tabella materiali), spessore/i, geometria del cianfrino, lunghezza saldatura, fase di produzione (prefabbricazione / montaggio / offshore), tipo di materiale, WPS, tecnica di saldatura, tipo di connessione e la data di accettazione della saldatura.
Sotto questa stringa sono elencati tutti i controlli che devono essere eseguiti sulla saldatura (tab. B) con specificato vicino la fase, l'Istruzione Di Lavoro utilizzata, l'operatore che esegue in controllo, l'estensione, il numero la data dei report, il giudizio (tab. C), la lunghezza di eventuali riparazioni e la WPS per eseguirle.

3. ATTACHMENTS/ALLEGATI

1A *Structural drawing* / Disegno Strutturale

1B *Piping drawing* / Disegno Piping

2 *Welding register* / Registro saldature

3 *Code description* / Descrizione codici

- Tab A *Item type* / Tipo pezzo
- Tab B *Non distructive test type* / Tipo controllo non distruttivo
- Tab C *NDT Result* / Esito CND
- Tab D *Indication Type* / Tipo di indicazione

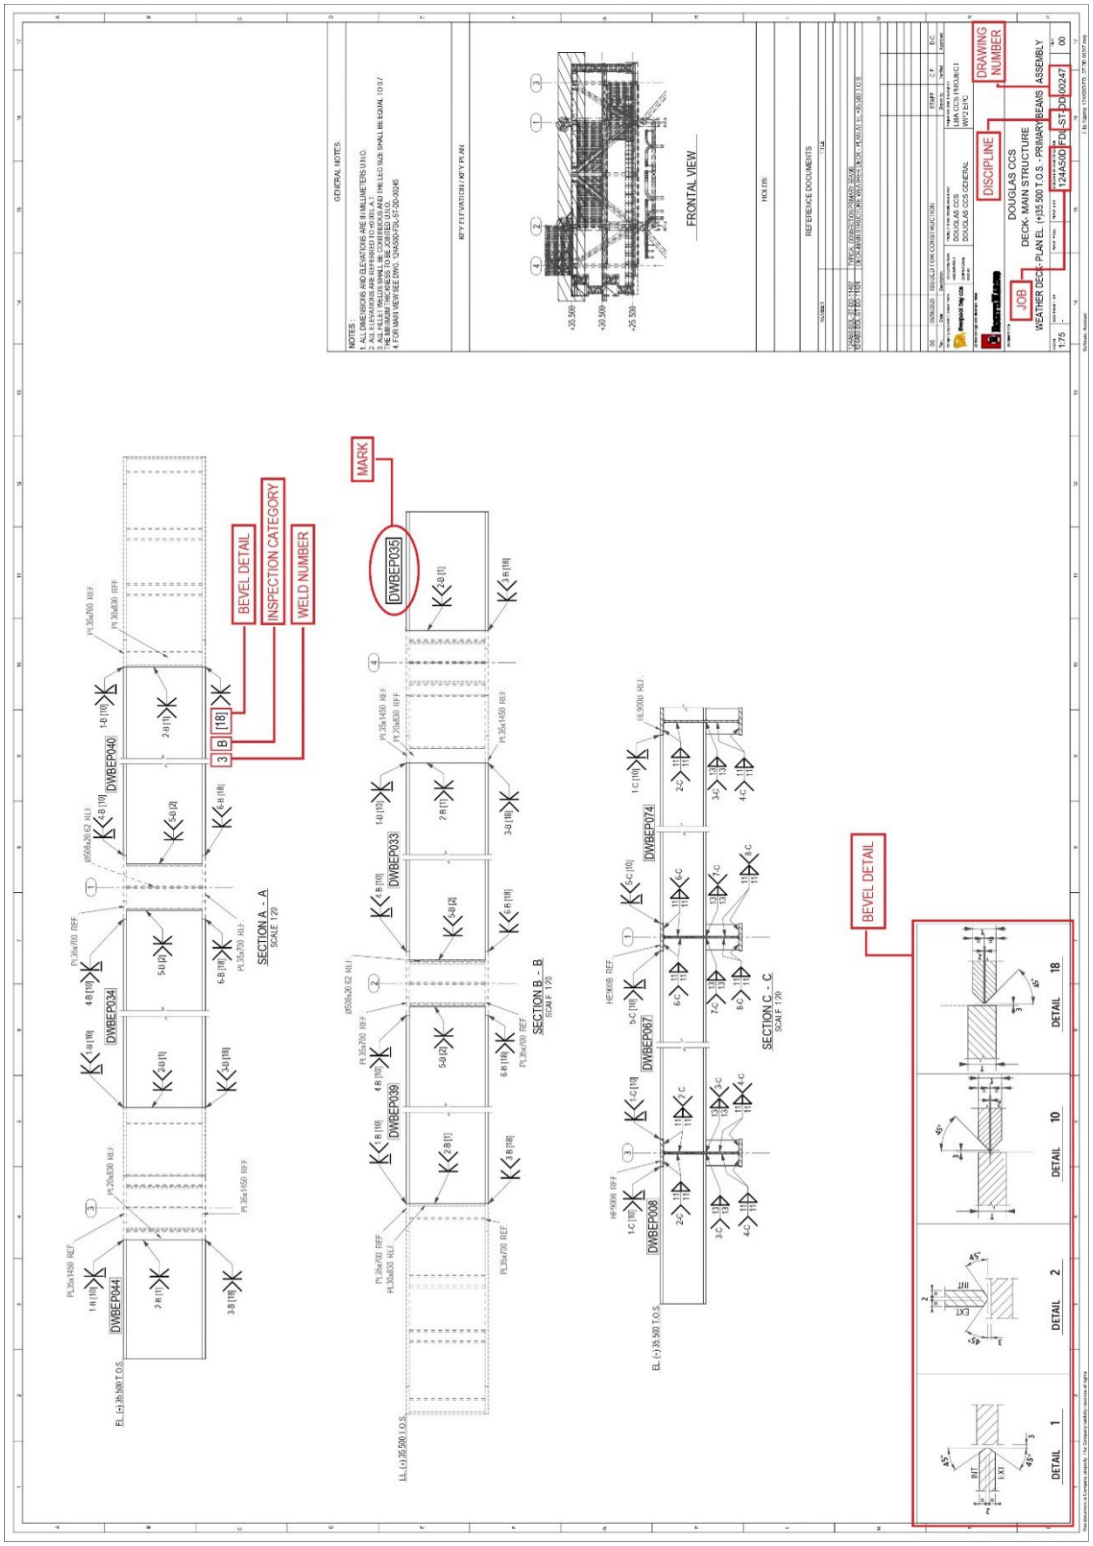
4 *Non destructive test report example* / Esempi di Rapporti controlli non distruttivi

Dye penetrent / Liquidi penetranti

Magnetic particle / Particelle magnetiche

Ultrasonic / Ultrasuoni

Radiographic / Radiografico



5 *Ultrasonic test report with indication* / Rapporto Ultrasuoni con indicazione

Indication report (second sheet) / Rapporto di indicazione (seconda pagina)
